

See how IBM FlashSystem™ puts you ahead of the competition.

Try Lighthouse IBM FlashSystem™ Proof of Concept at **No Charge**.

When it comes to business-critical applications, timing is everything. Delayed processing and critical data delivery escalate business and financial risks. To address these issues, many companies replace disk storage with IBM FlashSystem™ to revitalize their access to business-critical data. If you're experiencing performance issues on critical applications, take advantage of our free offer and experience the benefits of IBM FlashSystem™.

Highlights

- Benefit from new and powerful storage options
- Enhance your existing storage portfolio
- Assess and determine how to integrate FlashSystem into your storage environment
- Enhance your Return on Investment
- Scale your business with flexible, extreme-performance flash storage that accelerates low-latency, I/O-intense applications, including online-transaction processing (OLTP) and online-analytical processing (OLAP)

No-Charge Proof of Concept

Lighthouse will provide an IBM Flash System for you to use for up to 2 weeks. No binding commitments. No lengthy contracts. No charge. All we ask is that we meet as a team to identify a test case, success criteria, and a test plan. Then, test the FlashSystem™ to assess if it addresses your requirements. At the end of the 2-week period, you will determine the next step, if any. Your competitors already enjoy the benefits of IBM FlashSystem™ products, and we're looking forward to helping your business do the same. If you're interested in discussing the Lighthouse IBM FlashSystem™ No-Charge Proof of Concept, please call your Lighthouse Account Executive to arrange a meeting.
