Lighthouse certified technical consultants are helping small to large businesses achieve the highest levels of competitive advantage by maximizing their investment in IT resources through a cloud-based infrastructure. You can quickly get your business to where it needs to be when you connect with us. Experts within our specialized Microsoft practice area are available to help understand your cloud initiatives, to review your current IT and application environment, and to help you plan and execute your move to the cloud with confidence.

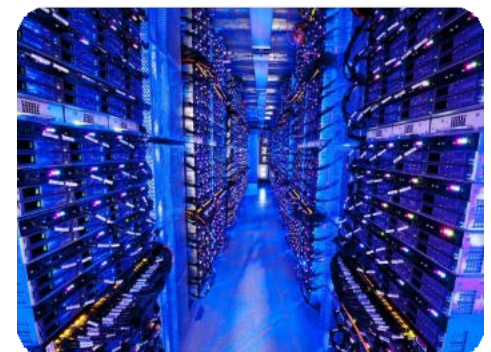

These are 'Hands On' sessions:

- Workshops are delivered at the Lighthouse training facility, Microsoft offices in MA, CT, NY or your facility.
- Lighthouse will assign 2 seasoned Cloud Architects to the session.
- Workshops are a half day in duration.
- If requested, workshops can be customized and extended to your requirements.
- For personnel not familiar with Azure, a brief introduction will be delivered.
- A pre-planning call is required.

We'll come prepared to guide you through a 'Hands On' session and to help you understand Azure, including:

- What are some typical use cases for leveraging cloud resources?
- What capabilities do Microsoft's cloud offerings provide?
- What are Azure connectivity solutions?
- We will set up Azure Trial subscriptions together.
- We will create Windows Azure Virtual Machines.
- We will leverage Visual Studio to deploy an integrated application to Azure.
- We will move an application from on-premises to Azure.
- We will move a VM from on-premises to Azure.
- We will scale an application to support tens of thousands of concurrent users.
