Compliance.
Ensure compliance with FITARA reporting requirements and downstream operational regulations. Collaborate with your organization and related entities using an integrated approach to managing FITARA.

Transparency.
Use FITARA Manager with IT Financial Management tools to provide integrated reports of the service, customers, run-the-business/grow-the-business costs, and additional costs. Understand how your organization's spending aligns to you mission.

Dashboard and Reporting.
Customized dashboards and reports to give you real-time view into your organization's management activities, portfolio & project management status, transparency and reporting initiatives, and other key IT activities.

Risk Management.
Use FITARA Manager and ServiceNow to manage Enterprise, Operational, and Program/Project risks. Mitigate risks with collaborative approaches to identify, visualize, and coordinate on risk resolution.

Organizational Assignments.
Create and post organizational assignments, complete with delegation of roles and responsibilities.

Report Generation.
Automatically generate your print-ready FITARA reporting requirements. Eliminate all the time previously spent on formatting and wrestling with document management. Improve efficiency and reduce mistakes and errors.

Instant Integration

FITARA Manager was designed to integrate with the complete Stave application portfolio for maximum benefit. Try taking your service delivery for customers to the max with Shared Services Manager, one of our business applications. Or ensure your providers are always on target with a utility integration with Stave Calendars to publish tasks across devices.

Powered by the Platform

All Stave applications are run within the ServiceNow platform. Because we leverage that power, our apps inherit every benefit of that solution, and make use of the powerful accessibility and redundancy of their datacenters. You benefit by leveraging your existing investment, and being able to go further, faster.

Print-Ready Report Creation

Generate your required FITARA reports for submission to the Office of Management and Budget. Automatically generate entire report sections from your authoritative IT and financial data sources.

Complete Reference Included

Includes a comprehensive reference manual, including all FITARA terms and definitions, ensuring that your entire agency staff is quite literally on the same page.
