

SOMETIMES THE THINGS YOU FIND ARE BETTER

You're a ServiceNow expert. Now, you've been given a new Requirements List. A different department in your enterprise just realized how they can consolidate their aging, legacy systems and migrate to applications running in ServiceNow.

So they expect you to build them an app. And document it. And maintain it. And serve as first-line support when anyone has a question or issue. And, of course, they still expect you to do your regular job as well.

You're probably starting to regret telling everyone how great the ServiceNow platform is and how consolidating disparate solutions into a single cloud-based system of record can save so much money and effort.

But now there's hope; purchasing apps from the ServiceNow Store. Instead of building something in-house or hiring expensive consultants, deploying new capabilities into ServiceNow is as simple as clicking "Try". Buying these apps gives your business

new features and capabilities in ServiceNow, plus the benefits are immediate and the costs are significantly lower than if you had to build it and support it yourself.

Now everyone can experience the benefits of platform and you look like a hero. By deploying apps available on the Store, you are now able to provide value to the business faster and with less effort, and each app is certified and supported by independent software professionals.

Sometimes the things you find accidentally turn out better than anything you could have built yourself. Introduce new ServiceNow capabilities to your enterprise the smart way and come alive with Store apps.
