

IT'S YOUR PROBLEM NOW

You're a ServiceNow expert. And look what you just walked into. Your new client has been a loyal ServiceNow customer for years. They started using the platform for their service desk, then used it elsewhere in IT, and then started using it all over their enterprise. They've got configurations and customizations all over the place and now you get to make sure everything continues to work.

Even though they're using ServiceNow for critical business functions, it looks like they put everything together with a mix of Client Scripts, bubble gum, duct tape, and good intentions.

You're starting to think that maybe you just walked into a trap.

Now there's a way out; purchasing apps from the ServiceNow Store. Instead of managing random code, deploying new capabilities into ServiceNow is as simple as clicking "Try". Buying these apps gives your clients new features and capabilities in ServiceNow, plus the benefits are immediate and the costs are sig-

nificantly lower than if you had to build it and support it yourself. That makes it easier for you.

Now everyone you support can experience the benefits of the platform and you look like a whiz. By deploying apps available on the Store, you are now able to provide value to the teams you support faster and with less effort, and each app is certified and supported by independent software professionals.

Just like your trusty pocket knife, Store apps provide countless capabilities, so why not start a free trial today, Mac.
