

IT'S NOT ALWAYS BETTER TO ROLL YOUR OWN

You use ServiceNow. You use it to deliver tremendous value to your enterprise. If you're like other users, you probably used it for the first time to help run your service desk.

Then, maybe others in your IT department starting using it. You realized that with all the power the platform had to offer, everyone at your company could get the same benefits as well. Human Resources. Facilities. Legal. You name it. But there weren't default applications that looked like the tools that these other groups were familiar with using.

Maybe you built a few applications yourself, or you hired a professional services organization to build them for you. But your time is valuable and hiring outside is expensive, so you felt pretty burned out.

But now there's a new option; purchasing apps from the ServiceNow Store. Buying these apps gives your business new features and capabilities in ServiceNow, plus the benefits are immediate and the costs are significantly lower than if you had to build it and support it yourself.

By deploying apps available on the Store, you are now able to provide value to the business faster and with less effort, and each app is certified and supported by independent software professionals. No more head-aches. Only good times... man.
