

STORAGE TANKS

Power Generation | Emissions Control | Thermal Energy Storage

When you're planning a power generation project, an emissions control project, a power conversion project or other significant project within the power industry, storage tanks will be an important piece of the puzzle. Our experience in the power industry means we have the know-how to operate within even the most complex facilities, and we can quickly adapt to your project's unique requirements. We're able to make ourselves right at home in power facilities ranging from combined cycle, clean coal and nuclear, to renewable energy and power plant retrofits.

For planning and executing power projects, you need a tank contractor who can support your efforts from start to finish, with tank engineering, custom fabrication and expert tank construction. We've been building tanks since 1948.

Depend on us.

TANKS FOR POWER

- ▶ Fuel oil tanks (single or double wall)
- ▶ Demineralized water tanks
- ▶ Service water tanks
- ▶ Fire water tanks
- ▶ Stacks
- ▶ FGD process tanks
- ▶ Scrubber or absorber vessels
- ▶ Storage or process silos
- ▶ Thermal energy storage tanks
- ▶ Duplex and stainless steel tanks and vessels

TANK SERVICES

- ▶ New tank construction
- ▶ Tank repair and maintenance
- ▶ Field painting
- ▶ Turn-key construction
- ▶ Shop blasting and priming
- ▶ Design and fabrication
