

BIOPROCESSH2O RECEIVES FIRST PLACE HONORS TWO YEARS RUNNING

Food & Beverage Environmental Conference

The Food & Beverage Environmental Conference is one of the premier environmental events for the food industry that is held annually in the United States. At the conference, companies within the food and beverage industry are able to share experiences with sustainable practices, environmental compliance, new technologies and approaches. Each year there is a technical poster session in which awards are given for the most appropriate case studies that meet the conference themes and objectives.

BioprocessH2O Poster Sessions:

FBEC 2014: High Strength Wastewater Treatment Using an External Crossflow MBR (Coca-Cola Facility)

- Conducted bioFLOW MBR Pilot Study
- Installed bioFLOW MBR System

FBEC 2015: Innovative Water Reuse Process Enhances Sustainability at Ridge Vineyards

- Installed bioPULSE™ MBR System for water reuse

BioprocessH2O received the first place honors two years running. Refer to the actual photographs of the system installations.
