Bridging Business & Technology

Cohesive Information Solutions is a management consultancy and system integrator, specializing in Enterprise Asset Management (EAM).

Serving as a collaborative partner to its customers, Cohesive helps organizations achieve operation excellence by developing and deploying industry best practices to maximize mission-critical technology investments.

MANAGEMENT

The Cohesive executive team collaborated for nearly 10 years, before formally incorporating in 1998. With more than 150 years of combined practical experience, the firm's principals leverage first-hand expertise in industry and technology to solve complex business problems through effective process and culture.

Cohesive earns the respect, confidence, and loyalty of its customers through a value system based upon customer rapport and understanding, delivery of the highest quality services available, professional impartiality, and personal respect for others.

SOLUTIONS

Business Transformation Consulting — operational assessments, requirements definition, work, asset & supply-chain process evaluation and refinement.

Maximo Software Sales & System Implementation — project planning, process and data reconciliation, application configuration, change management, procedure development, training, validation, and help desk support.

Technical Services — infrastructure, product installation, data migration, system interfaces, application technical support, product extensions, business intelligence and report development.

Mobile Computing — GIS & Mobile solutions that extend the capabilities of existing technology investments and significantly improve the way people work.
