

# High-Quality Furniture Veneers

that Complement and Perform

**ARCHITECTURAL  
FOREST PRODUCTS**

Integrate AFP quality veneers into your furniture solutions for beautiful, reliable performance. AFP manufactures superior furniture veneers that reflect exceptional industry leading standards. Our world-class veneering expertise lets us produce both veneers and laminates to complement and complete a wide range of furniture solutions—from work surfaces and tabletops, to architectural walls and doors and more.

All AFP products are made to order with careful attention to detail, making AFP the premier supplier of veneered products to the architectural community. AFP understands the intricacies and complexities of the contract furniture business and its demanding quality standards and schedule requirements. And that means our consistent high quality and lead-time reliability are second to none.

Quality that performs.  
**Beauty that lasts.**

### **Furniture Elements**

AFP veneers can enhance and complement a wide range of furniture solutions. Our custom and durable veneers are ideal for work surfaces, desks, conference tables and for panels and doors in furniture and architectural wall systems.

### **Profile Wrapping**

Our veneer profile wrapping expertise provides a beautiful cost-effective solution for coordinating trim, mouldings and millwork to match just about any project specification. We can expertly wrap veneer around metal, plastic, fiberglass and wood.

### **Custom Solutions**

AFP can help in the development, interpretation and fulfillment of custom furniture design specifications. Our finish department offers custom sizing, staining and finishing of all veneers. We also offer special (sketch) matching with an infinite number of patterns and custom capabilities to beautifully and creatively bring your furniture designs to life, regardless of shape or size.

### **Quality Veneer**

AFP wood veneers deliver superior durability while maintaining the richness and authenticity of genuine wood. Our superior veneer process reflects meticulous expertise and craftsmanship in slicing, assembling and matching materials.
