

## 2017 List of Covered Drugs

PLEASE READ: THIS DOCUMENT HAS INFORMATION ABOUT THE DRUGS WE COVER IN THE FOLLOWING PLANS:

Plan:

Gold EPO

Silver EPO

Bronze EPO

Catastrophic EPO

Silver HSA EPO

Bronze HSA EPO

Members must use network pharmacies to fill their prescription drugs. Your benefits, drug list, pharmacy network, premium and/or copayments/coinsurance may sometimes change.

## What is the Drug List?

The drug list is a list of drugs covered under Bright Health plans. Bright Health works with a team of health care providers to choose drugs that provide quality treatment. Bright Health plans cover the drugs on our drug list, as long as:

- The drug is medically necessary
- The prescription is filled at an in-network pharmacy
- Other plan rules are followed

## Can the Drug List change?

The drug list may change from time to time as described in plan documents or other plan materials. The enclosed drug list is the most current drug list covered by Bright Health plans.

## How do I use the Drug List?

There are two ways to find a drug on the drug list:

### 1. Medical Condition

The drug list starts on page 4. The drugs on this drug list are grouped by the type of medical conditions they are used to treat. For example, drugs used to treat a heart condition are listed under CARDIOVASCULAR.

- If you know what your drug is used for, look for the category name in the list that starts on page 4.
- Then look under the category name for your drug

### 2. Alphabetical Listing

If you are not sure what category to look under, look for your drug in the Index that starts on page 52. The Index is an alphabetical list of all the drugs in this document. Both brand-name drugs and generic drugs are in the Index.

- Look in the Index and find your drug
- Next to your drug, see the page number where you can find coverage information
- Turn to the page listed in the Index and find the name of your drug in the first column of the list

## Bright Health Drug List

The drug list gives information about the drugs covered by Bright Health. A generic drug is approved by the FDA as having the same active ingredient as the brand-name drug. Generic drugs usually cost less than brand-name drugs, but provide the same quality of treatment.

The first column of the chart lists the drug name. Brand-name drugs are capitalized. Generic drugs are listed in lower-case italics.

The second column of the chart, Drug Tier, tells you which tier the drug falls under. Drug tiers are how we divide prescription drugs into different levels of cost. How much you will pay will depend on the individual plan, however, here's what the drug tier tells you:

- **Tier 1:** Preventive drugs with no member cost share under the ACA
- **Tier 2:** Generic drugs
- **Tier 3:** Preferred Brand drugs
- **Tier 4:** Non-preferred Brand drugs
- **Tier 5:** Specialty drugs

The information in the Requirements/Limits column tells you if there are any special requirements for coverage of that drug. These requirements and limits may include:

- **Prior Authorization (PA):** Bright Health asks you and your doctor to give more information for prior authorization of certain drugs. This means that you need to get approval from Bright Health before you fill your prescriptions. If you don't get approval, Bright Health may not cover the drug
- **Quantity Limits (QL):** For certain drugs, Bright Health limits the amount of the drug that it will cover. Bright Health also limits the amount of drugs you may receive within a class of drugs. These classes have an "§" next to them on the drug list. These are drugs with safety and addiction risks; therefore, only one drug should be taken at a time for safety reasons. This may be in addition to a standard one-month or three-month supply.
- **Step Therapy (ST):** Bright Health needs you to try certain drugs as the first step to treat your medical condition before covering another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, Bright Health may not cover Drug B unless you try Drug A first. If Drug A does not work for you, Bright Health will then cover Drug B.
