“Web Notifications are a great way to engage users - it is probably the best one-on-one communication tool between a publisher and a reader ”

Arun
FounderTrak.
in

Early Hiccups

Lock-In

User consents were taken on solution provider's subdomain, limiting the user experience and creating a permanent lock-in and dependency

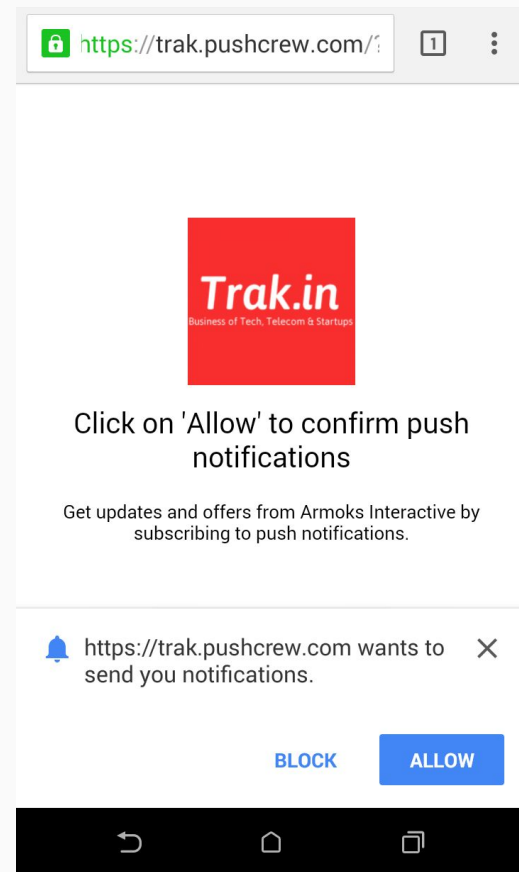

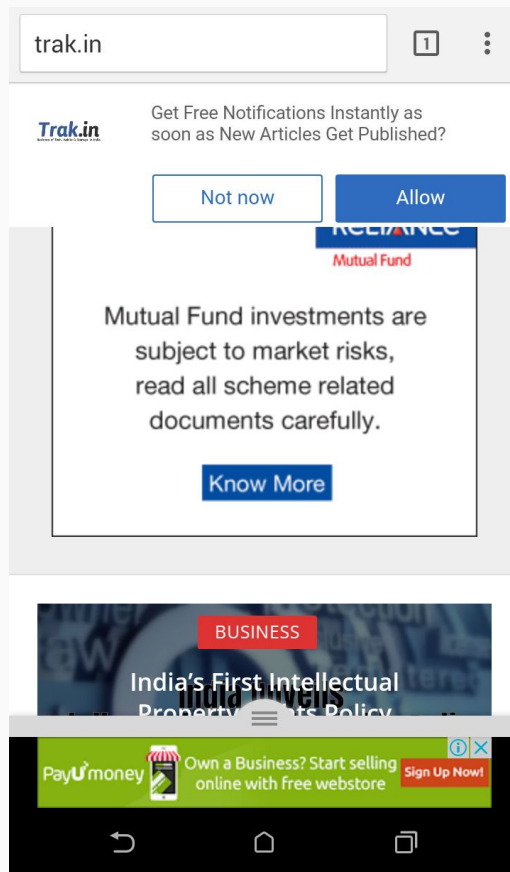

Limiting Scale

Subscription was a 2 Step process for users - thus, increasing the drop off rates and limiting subscription.

Status Quo

- Existing process was a 2 Step process
- Users subscribed to a 3rd party domain and not the brand domain

Two step process involving redirection

iZooto Approach

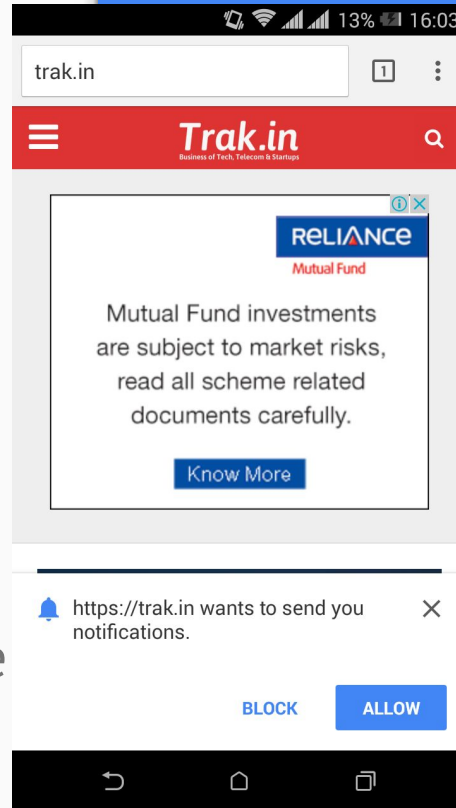

User First - Cookie Less Solution

Client First - Users subscribe to your domain

Better Conversions - Scale faster and better

User Subscribe to Trak.in directly

No Redirects and No Dropoffs

1 Click Subscription
Simple and Easy

Integration of iZooto Tag
on Trak.in pages

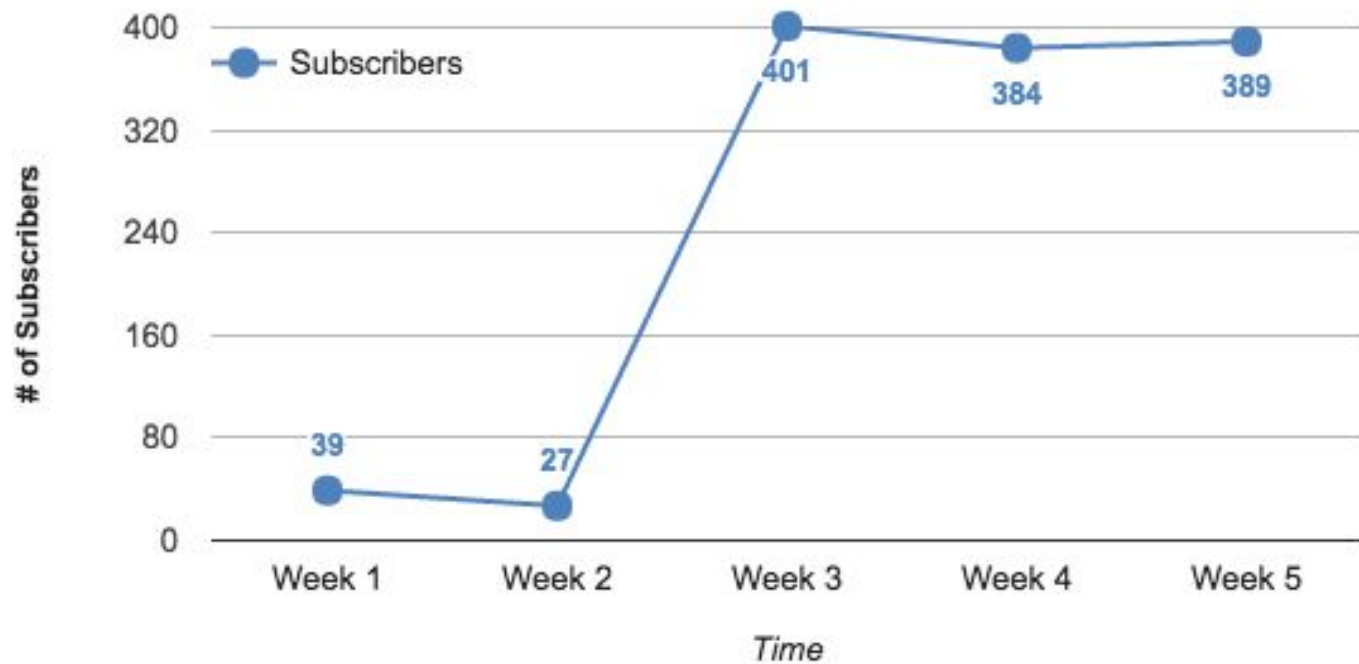

10X Impact

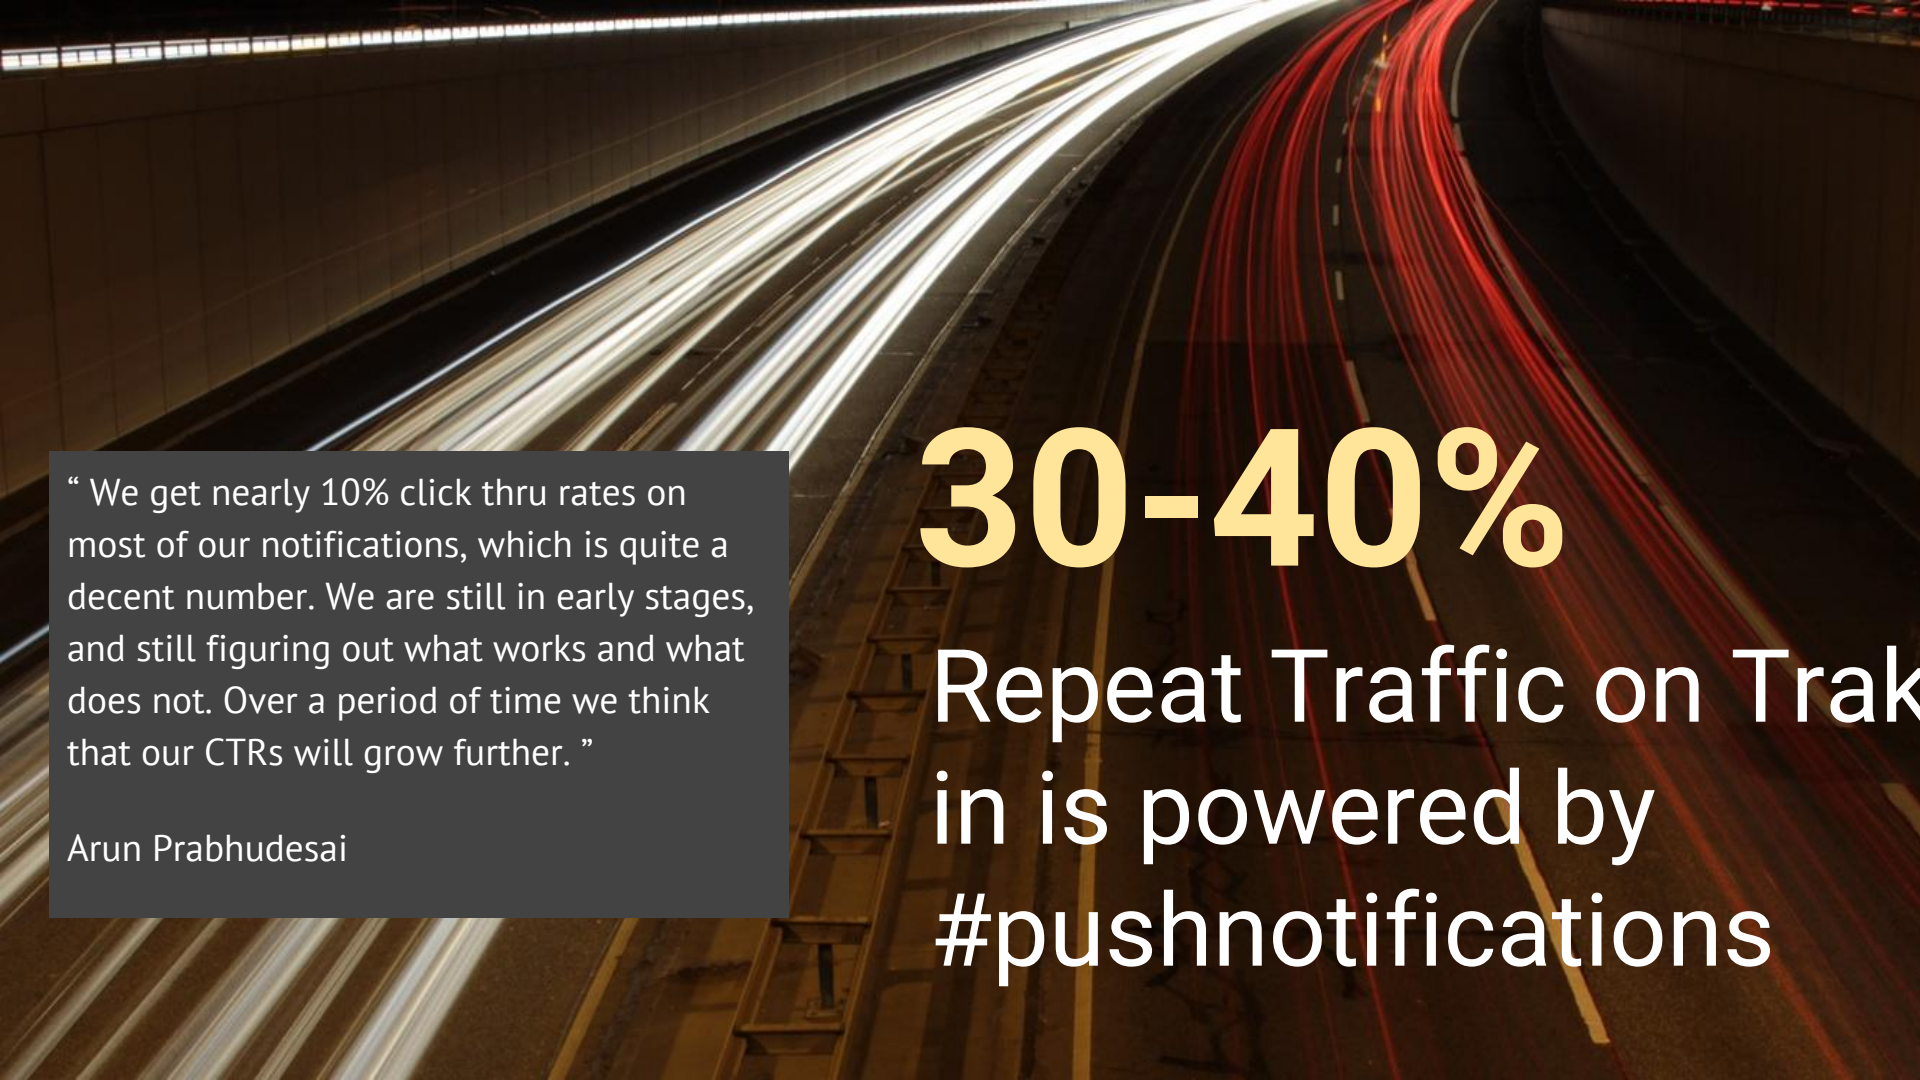

“The current process increased the subscriber conversion by about 8x to 10X - Earlier we collected around 40-50 subscribers in a day and now with the new method we do around 300 to 400 subscribers”

*Arun Prabhudesai,
Trak.in Founder*

Subscriber Acquisition

A long-exposure photograph of a tunnel with light trails from vehicles. The trails are primarily white and red, curving through the tunnel. The walls of the tunnel are visible on the left side.

“ We get nearly 10% click thru rates on most of our notifications, which is quite a decent number. We are still in early stages, and still figuring out what works and what does not. Over a period of time we think that our CTRs will grow further. ”

Arun Prabhudesai

30-40%

Repeat Traffic on Trak
