FINO

Versatile Enterprise Solutions
powered by the cloud

Fino was born in the cloud. We excel at rolling out and managing cloud systems, and we understand how to integrate cloud solutions with other aspects of our clients' computing environments. With expertise in a variety of cloud technologies, our team knows how to apply the right tools to solve enterprise challenges.

Why We Use the Cloud

Cloud platforms benefit our clients because they are:

» **Affordable** Cloud services offer economies of scale businesses often can't achieve on their own. The result is a better solution at a lower cost.

» **Scalable** The cloud helps businesses quickly and easily scale up and down as demand changes, so they can plan for the future without paying for infrastructure they don't need.

» **Manageable** If maintaining a closet full of servers isn't part of your core business, there's no need to invest resources in installing updates, planning for disaster recovery, fixing outages, etc. Cloud services let companies unload those time-consuming tasks.

» **Versatile** It's expensive and difficult to install on-premise systems that only work for one vendor or type of technology. Cloud systems make it easy to pivot to new solutions as needs change.

CLIENT WORK

We've used cloud platforms to build powerful solutions for clients such as:
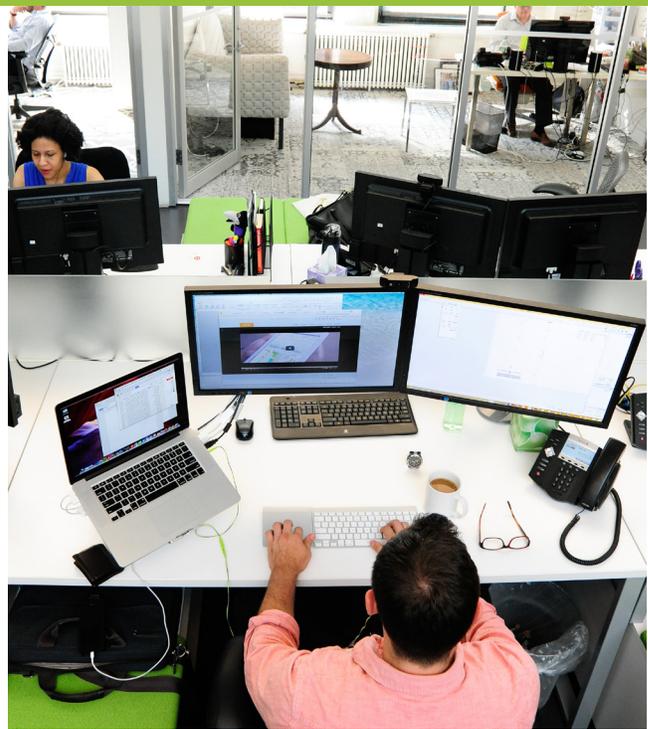

Pearson
Direct Energy
PowerSecure
Hess
CBS
Deloitte

CLOUD PARTNERS

Microsoft
Horton Works

How We Use the Cloud

We've used cloud technology to help our clients in several areas, including:

» **App Development** We build software that lives in the cloud. Our applications use the cloud to store data, so it can be shared across platforms and systems, centrally managed, and pooled together to perform complex analytics.

» **Cloud Services** A lot of technology that would have been out of reach for many enterprises is now accessible thanks to the cloud. We've helped clients improve business performance with Machine Learning, Internet of Things, and other cutting-edge technologies utilizing cloud-based services.

» **Hybrid Environments** For legal or legacy reasons, companies often need to keep parts of their infrastructure on-premise. We've helped businesses get the best of both worlds by building new cloud capabilities that seamlessly interact with the rest.

"By innovating with Microsoft Cloud technologies, Fino is helping to solve clients' problems and turn ideas into reality."

Jenni Flinders, VP of U.S. Partner at Microsoft

Our expertise

Fino has earned a Cloud Platform competency certification from Microsoft, and has experience working in multiple cloud environments, including Microsoft Azure, Amazon Web Services, and Rackspace. Our team members are experts using many different cloud-based technologies in enterprise environments. Some of the tools we've used include:

» Azure Websites

» Azure Machine Learning

» Azure SQL

» Azure Storage

» C#

» HDInsight

» Hadoop

» Salesforce

» Tableau

ABOUT FINO Fino is a leading provider of custom enterprise technology solutions. We use broad technical skills to build integrated systems that connect business units and automate complex processes. Our data-driven and user-focused software helps companies solve problems, engage customers, and grow their businesses. Founded in 2006, Fino was recently named one of the fastest-growing software companies in the U.S. by Inc. Magazine.
