Unprecedented Access Control

With more than 25,000 installations in 30 plus countries, PTI Security Systems is the world standard for Self-Storage access control. Our systems control more than 10 Million tenant access codes world-wide. Start as simple or as sophisticated as the business requires and expand the functionality as the operation grows. Whatever your needs, we have an access control solution for your facility. StorLogix 4 has been expanded and enhanced to provide you with the security and control that your property needs to be competitive in this ever changing market. With StorLogix 4 and the StorLogix Mobile application you will always be in full control of your property.

Better Than Ever...

StorLogix 4 has over 200 new enhancements along with several exciting new features:

- StorLogix Mobile Application* - Control from your moblie device whenever and wherever you are.
- Control multiple properties locally, over the Internet, or with Dial-Up modems from one computer.
- Enhanced Reporting Capabilites.
- Works with Microsoft® Windows® 8

Mobile. Like You...

With StorLogix 4 you can control your facility from anywhere at any time directly from your smart phone or mobile device:

- Remotely open doors or trigger gates.
- Immediately see who is on-site.
- Easily change whether or not a tenant is locked out.
- View current or historical site activity for a tenant or a storage unit.
- Works with the INSOMNIAC™ ILock system.

System Features

- Hundreds of customizable system messages.
- E-mail alert communications.
- Support for as many as 10,000 units and 10,000 users.
- Connect via TCP/IP locally and/or remotely.
- Support for remote annexes with dial-up modems with automated sharing of a single connection.
- Ability to centralize your site data.

*Standard cellular data rates apply. Additonal StorLogix license fees and configuration required.

Capabilities

- On-board Ethernet, USB and RS-232 connectivity.
- Storage of up to 40,000 events in safe, non-volatile memory.
- Two industry standard Wiegand inputs.
- 12V DC power supply on board with battery backup.
- Hundreds of configurable access levels and time schedules.
- LogixScript capabilities for the ultimate in configuration options.
- Thousands of flexible input and output points for end-to-end solutions.

Benefits

Whether you have one or many Self-Storage facilities the StorLogix and FalconXT system gives you the control and the ability to scale as your operations expand. Keypads provide points of entry and card/code access to manage customer and visitor traffic.

The FalconXT system controller (Model #PXTBUUET825P) integrates all functions for securing and monitoring the facility. It supports as many as 125 RS485 devices, eight supervised inputs, two industry standard Wiegand devices, and four dry-contact relays. An on-board Ethernet connection provides TCP/IP communication with a host computer.

StorLogix software (Model #PSLSW4STD or PSLSW4UPG) is a Windows®-based solution that is fully integrated with the FalconXT system controller as an easy-to-use configuration and management tool. The intuitive graphical software facilitates the setup process for access areas and times, monitoring zones, alarms, and viewing site activity. Establish facility communications using an office computer with local or remote facilities. StorLogix interfaces with many industry standard management software packages to save you time and money.

Technical Specifications

No other controller solution provides the level of flexibility, integration, and scalability that is available with the FalconXT and StorLogix combination.

FalconXT (Model #PXTBUUET825P)

Max AI Devices	125
Connectivity (PC)	RS-232, USB, TCP/IP
Connectivity (AI Device)	RS-485, 900 MHz Wireless
Board I/O	2 Wiegand devices, 8 Inputs, 4 Relays

StorLogix (Model #PSLSW4STD or PSLSW4UPG)

Units/Users	10,000/10,000
Custom Messages	700
User/System E-mail Alerts	Included
Communications	RS-232, RS-485, RS-422, TCP/IP, USB, 900 MHz two-way wireless
