Customized For Precision

10B Timber Lane, Marlboro, NJ 07746 • (732) 780-5300 • FAX: (732) 294-0001 • www.tandcplastics.com

T&C Model HLA high level alarm system consists of an alarm control box that is weatherproof rated NEMA4/4X, 6' 120VAC power cord, 360 (degree sign) viewable alarm light, 85db @ 10' solid tone alarm, and a silence and test button that is to be mounted to the nearest structure. Also included is a float switch that is mounted inside of the interceptor for oil and / or grease level detection and is connected to the alarm control box.

The purpose of the high level alarm system is to monitor and send an audible and visual alarm when the oil and / or grease capacity is approximately 75% full. High level alarm systems can be installed on any T&C oil or grease interceptor to allow the customer to monitor oil and grease levels. This allows the interceptor to be maintained when required.
