## **Florida Orthopaedic Institute Chooses RCxRules’ Predictive Rules Engine**

Burlington, VT – January 28, 2016 – RCxRules, the provider of business process automation technology for the healthcare revenue cycle, announced a new client’s success today: Florida Orthopaedic Institute, Florida’s largest orthopedic group that serves the greater Tampa Bay area.

RCxRules is providing Florida Orthopaedic Institute with their predictive rules engine platform, a robust, intuitive rules engine that sits at the front end of a healthcare organization’s revenue cycle process, seamlessly integrating with the existing EMR and RCM systems to automate the review and correction of charges before they hit the healthcare organization’s billing system.

“RCxRules has allowed us to write more specific rules tailored to our payers and providers, which in turn has allowed us to ensure that cleaner claims are going out the first time,” said Lynn Schulman, CPC, Special Collections Manager for Florida Orthopaedic Institute. “We have cut down on both the time frame for payment from some payers and the denials we were seeing previously. As the person responsible for coding and collections, I’m very happy with the functionality, ease of use, and the customer support.”

“Our rules engine has been a good solution for Florida Orthopaedic Institute and we’re delighted to positively impact their revenue cycle by feeding it with the cleanest charge data possible,” said Stephen Gorman, Chief Executive Officer of RCxRules.

### **About Florida Orthopaedic Institute**

Florida Orthopaedic Institute brings highly skilled orthopedic care to Tampa Bay and the surrounding area by offering virtually unmatched expertise in every orthopedic subspecialty. Our physicians are known nationally and throughout the world for their work in orthopedic surgery and have been named among the best orthopedic physicians in America. As Florida’s largest orthopedic group, our mission is to provide an internationally recognized level of orthopedic care, achieving exceptional outcomes through continuing research and specialty expertise. ### **About RCxRules**

RCxRules enables healthcare organizations to virtually eliminate denials that are based on bad data, thereby significantly increasing the velocity of payments and ensuring compliance. Our data-driven approach, fueled by the industry’s only predictive rules engine, automatically fixes issues before they affect the revenue cycle, delivering the cleanest possible data—every time, guaranteed. RCxRules’ robust, intuitive rules engine sits at the front end of your revenue cycle process, seamlessly integrating with your existing EMR and RCM systems. This allows for the automated review and correction of charge and patient data—before hitting your financial system. For more information, please visit <http://www.rcxrules.com/>
