

Zedi Automation Solutions

Intelligent Measurement, Control and Optimization of Production

- Custom Engineered Solutions
- IIoT Oil and Gas SCADA Experts
- Control and Optimization
- 24/7 Customer Care

Custom solution to deliver results

Automate your field and realize the value of electronic flow metering (EFM) combined with Supervisory Control and Data Acquisition (SCADA) systems. We'll manage the entire project end-to-end to achieve results on-time and on-budget.

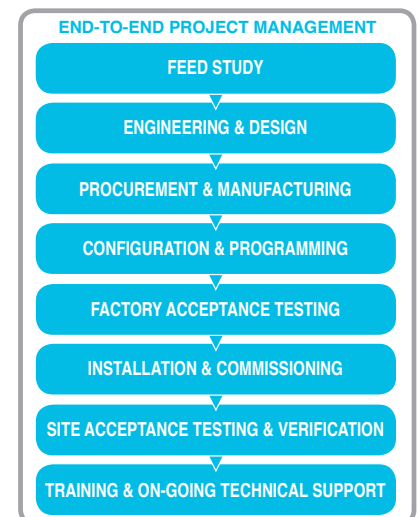

- Assessment to understand challenges
- Feasibility & due diligence study to identify requirements
- Recommendation, procurement, manufacture and installation of equipment
- RTU programming/configuration
- Acceptance testing, P.Eng sealed
- Integration with or replacement of existing control systems
- Implementation, training and ongoing technical support

Rugged, reliable and accurate

Zedi hardware at your well head, so you don't have to be.

Including electrical, control, instrumentation, communication equipment, a secure network infrastructure, custom oil and gas software and engineering expertise with project management to implement and support.

- Effectively consolidate data
- Oil and gas SCADA engineering experts
- One Stop Shop: Measurement, monitoring and communication equipment
- Secure, flexible and redundant network with remote data access and alarms
- Implemented to meet local regulatory and safety regulations

Software Solutions

- Create efficiencies and scalability
- Reduce operating cost
- Improve accuracy and timeliness
- Optimize Production

Simplify and scale your business process with Zedi's secure cloud infrastructure built for oil and gas.

Increase profitability and operational excellence with real-time analytics for better performing assets, streamlined compliance, and optimized resources. Gain efficiency with anytime, anywhere, access to accurate and reliable data utilizing mobile accessibility to view exactly what you want to see, when you want to see it. Leverage the power of Zedi's industrial IIoT platform and purpose built applications to drive your business forward.

Automation Solutions

- Custom Engineered Solutions
- IIoT Expertise
- Control and Optimization
- Solution to deliver results
- 24/7 Customer Care

Zedi practically started the IIoT revolution with our vision, exploration and innovation

We've been at the forefront of oil and gas technology for over twenty years. Rugged, reliable and accurate Zedi hardware at your well head so you don't have to be. Remotely control a variety of devices from a single easy-to-use network.

Measurement Solutions

- Loaded with safety
- Backed by technology
- On and Off-shore Expertise
- Integrated Lab Data

Safe and reliable field and lab experts backed by technology

Decades of field experience, knowledge of local challenges in production operations, maintenance with top notch, on-site Lab Services. Rigid standards with proven methods combined with fully inspected equipment, and an expertly trained, safety-certified team. Speed and accurate measurement give you laser focused abilities to bring your profit margins higher.

Artificial Lift Solutions

- Best in class Service
- Accelerated production
- Optimized performance
- Wellhead intelligence

Get the most from your reserves with well site intelligence

Remote monitoring and two-way control for any Artificial Lift; from sucker rod pumping, ESP's, PCP's, gas lift, plunger lift and everything in between; we've got you covered! Precise rod string control for rod pumping with sophisticated optimization capabilities with either AC or gas driven hydraulic powerpak options. Hydraulic rod pumping lifecycle flexibility and smaller lease footprint for well site space constraints.

Field Solutions

- Expertly Trained
- Cost Flexibility
- Best in Class Ops
- Loaded with safety

Decades of safe and reliable field experience

Full life cycle well support. From gaining access to remote sites, site design and construction, complete flow operations, to responsible abandonment. Safe, qualified and knowledgeable personnel with decades of experience in an operating range from a single well battery to complete management of field operations. 24/7 monitoring and service with wells remotely supervised, controlled, and alarmed at the fraction of the cost of an operator's time.
