

Improved Material Transfers (MT) Inbox

You will now be able to easily keep track of your equipment when transfers happen with a Material Transfers (MT) Inbox. This new feature will show each user where the transfer is in the process as it moves from Originator, Reviewer, and Approver. The inbox provides an enhancement to the workflow by allowing users easily track MTs in one place. Review the images below:

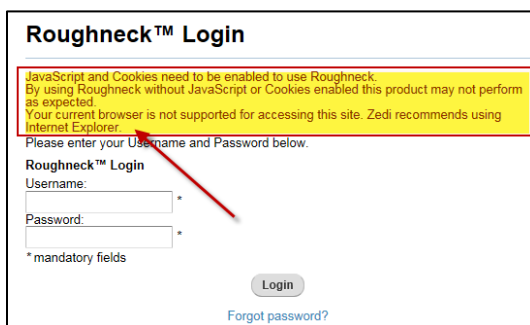

The screenshot shows the 'Material Transfers Inbox' page. It displays a table with the following columns: Action, Approval Status, From Surface Location, From Bottom Hole Location, MT ID, Prepared By, To Surface Location, To Bottom Hole Location, and Total Value of MT. The table contains one entry for a flare/incinerator with a total value of \$2.00.

Action	Approval Status	From Surface Location	From Bottom Hole Location	MT ID	Prepared By	To Surface Location	To Bottom Hole Location	Total Value of MT
- Action -	Pending Approval							\$2.00
824690	Flare/Incinerator - Stacks - Flare				Surplus			\$1.00
Total Value of all 1 MTs								\$2.00

Non-Support of (IE9) or below

You will now receive a message when logging into Roughneck if your browser is out of date. Zedi encourages all users to update their current browsers to (IE10) or Chrome.

At Zedi, it is our goal to help you realize your production potential, simply.
