

Xybix Comprehensive Cable Management Solutions

Out of Sight for Peace of Mind - In Sight for Easy Access

Effective cable management is an essential part of Xybix's unique ability to provide maximum adjustability without the "rats nest" of cable clutter in your knee space.

Xybix's cable management solution provides easy access to all wiring, while concealing unsightly cabling and securing it for repetitive movement throughout the work station.

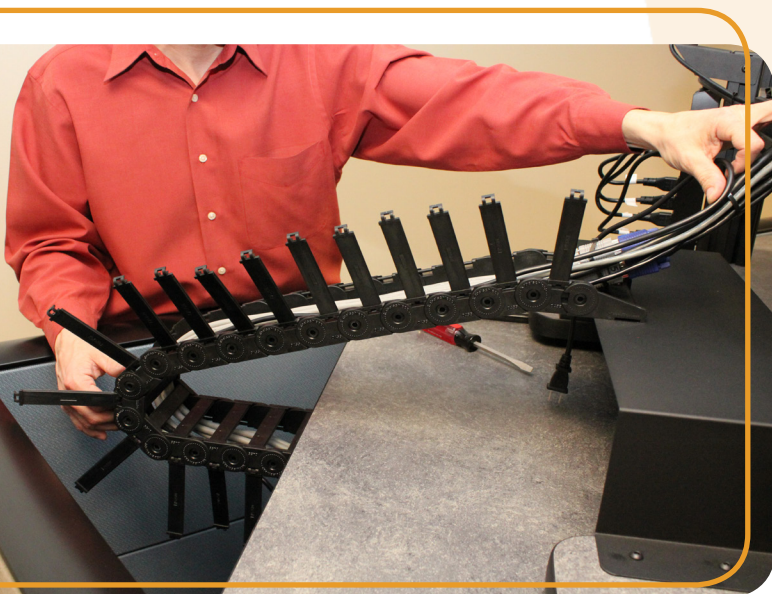

In-panel cabling, effective energy chain cable management and innovative and exclusive DataDock desktop power/data, provide easy access and end-to-end cabling solution.

Key Concepts / Benefits

Benefits

- Organized, concealed cable management solution.
- Only manufacturer supplying end-to-end cable management.
- Integrated cabling systems for entire work station including consoles, panels and storage areas.
- Cable management allows for a complete range of motion for monitors and other electronics.
- Desktop access through DataDock for easy access to keyboards, mice and more.

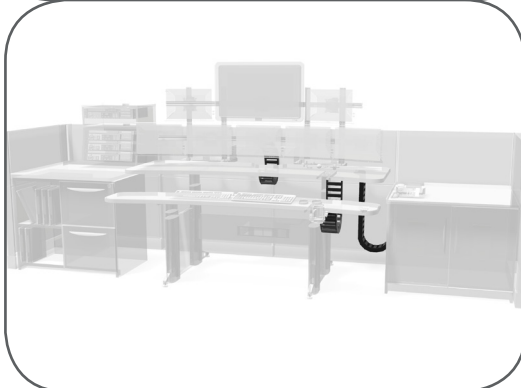

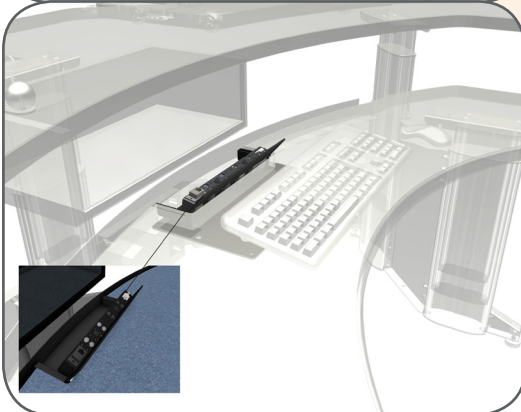

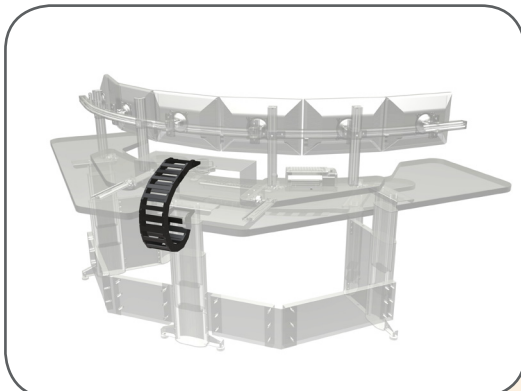

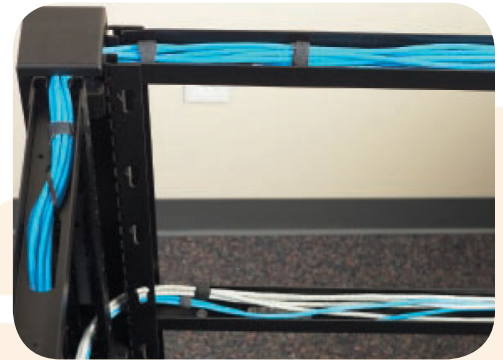

Xybix's commitment to an ergonomically superior workstation is shown by our optimal cable management made for you - the user!

Differentiators

The Xybix Difference

- Exclusive Cable Round-Up for multiple monitor cable management.
- Innovative Energy Chain for organization of main CPU, network, phone, power and more.
- DataDock desktop ports
- Complete in-panel cable management system
- CPU folding cable arms for easy service
- All cable connections positioned at easily accessible locations

Features / Components

DataDock

- Integrated within the front work surface, flips up for user access and then closes flush with the work surface
- Allows users to easily add/change keyboards, mice and other personal electronics
- Customizable grouping of connectivity ports includes:
 - USB, PS/2, phone, network, VGA, serial, audio

Energy Chain

- Complete organization of main monitor, CPU and other electronic cabling that moves with the dual work surfaces
- Positioned outside of users foot/knee space
- Meets EIA/TIA bend radius requirements
- Quickly add/change cabling with easy open clips

J-Channel

- Horizontal cable management
- Mounts out of sight under monitor work surface

CPU Folding Cable Arms

- Exclusive to Xybix, enables CPU cables to move with sliding shelves
- Easily add future cables without user disruption
- Durable steel construction

In-Panel Cable Management

- Pre-constructed out-of-sight raceways for tidy, effective cable distribution.
