

SKYPEFORBUSINESS

Stay connected in a modern world with Skype for Business, an end-to-end meeting and voice solution that integrates with all of your Office 365 applications. Lower your TCO by consolidating all conferencing needs into one seamless user experience with professional meetings and collaboration.

Save Money.
Stay Connected.

Move your entire communications stack to the cloud

Skype for Business builds on the familiar experience of Skype and the enterprise features of Lync, combining audio, video and web meetings in one unified platform supporting virtually any device. SADA Systems' flexible deployment options allow organizations to strengthen or replace existing conferencing solutions in order to save costs while providing high definition business communication.

SKYPE MEETING BROADCAST

- Produce professional, engaging events, broadcast to up to 10,000 attendees
- Attendees can view the meeting live online from virtually any browser or device
- Near real-time and on-demand viewing
- Attendees use DVR controls to pause, rewind, or restart the live stream

PSTN CONFERENCING

- Use a traditional dial-in number to join Skype meetings
- Dial-out to bring participants into the meeting
- Dial-in conferencing enables attendees to join an online meeting even without internet access

CLOUD PBX WITH PSTN CALLING

- Make, receive or transfer calls from any device
- Eliminate costly PBX systems
- Global call management within Office 365
- Subscribe to calling plans from Office 365, use existing phone numbers or get new ones
- ExpressRoute and QoS provides dedicated connection to Office 365

A FEW OF OUR CLIENTS

WesTech

BCBGMAXAZRIA

“

Anybody in the company can use Skype for Business to have meetings with people inside and outside of WesTech. It helps with internal and external communication, which is key to our success. We're really excited about that.

”

LOGAN TURNER,
Senior Systems Engineer,
WesTech
