

## Leaders are leaders for a reason

When you need to amplify your coding, turn to your partner in the industry, EncoderPro.com from Optum360, not knock-offs that don't compare.

More than 60,000 users rely on Optum360™ EncoderPro.com every day to get their jobs done more productively and profitably than they can by using coding books alone.

EncoderPro.com builds on your coding knowledge base and continuously takes you to the next level. Other products in the market may claim to do what EncoderPro.com does, but not all online coding tools are built the same. Feel comfortable with Optum360 online coding resources secure in the knowledge that all coding content in the sources used for the code sets and referential data, cross code and lay descriptions, mapping data and compliance rules, as well as the number of the rules reviewed during claim checking, is proprietary to Optum360.

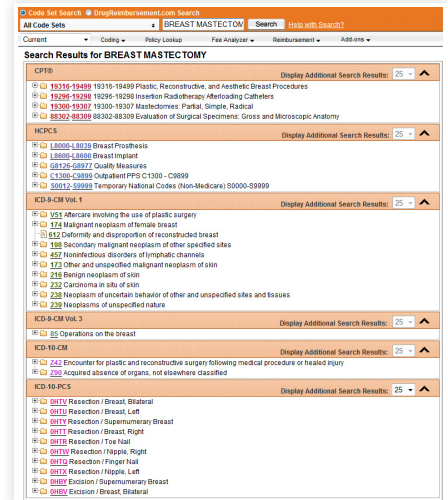

To help you make the most informed choice as to which product best suits your needs, we've compiled a list of questions to carefully consider for each product that you are reviewing, especially if you're considering two recent additions to the market.

### What logic/content is used to find codes when searching?

EncoderPro.com utilizes proprietary Optum360 CodeLogic™ search engine technology. To identify the most accurate codes and other related conditions to a searched term, multiple sources of content are used, such as code book indexes, descriptions, lay descriptions, tabular information, coder's dictionary content, mapping data, synonym, acronym and terms-to-code lists, and more. Searches are conducted across all code types and presented on the same screen, making it easier to find the coding information needed.

### What coding compliance guidelines are used to help avoid rework and resubmission?

EncoderPro.com reviews more than 80 Medicare coding rules and 50 commercial payer coding rules, leveraging 20 years of claim scrubbing expertise, and all coding rules and/or guidelines are sourced to established and respected coding organizations, such as the AMA, ASA, AHA and Medicare. While CCI, medical necessity, age and gender checking are all a part of the claim review that EncoderPro.com runs, just like other tools on the market. But with EncoderPro.com, the level of claim review goes far deeper including many modifier edits, Medicare policy edits, and code specific edits no other tool on the market can duplicate.

## Is only the CMS GEM mapping content logic being applied?

EncoderPro.com uses the GEMs, and also applies our proprietary Optum MapSelects mapping logic for both forward and backward mappings. With the GEMs, only limited ICD-9-CM to ICD-10-CM relationships exist and they do not consider coding conventions or guidelines. EncoderPro.com also takes combination codes into account.

ICD-9-CM Code	Description	ICD-10-CM Code	Description
270.00	Other labetalol preparations		

Coding Type	Code Set	Description	Code Information	Instructional Notes	Backward Mapping to ICD-9-CM
U	ICD-9-CM	Diabetic retinopathy of the macula (ICD-9-CM 362.01)			238.02
U	ICD-9-CM	Diabetic retinopathy of the macula (ICD-9-CM 362.02)			238.02
U	ICD-9-CM	Diabetic retinopathy of the macula (ICD-9-CM 362.03)			238.02

## What information is included from the core coding publications?

EncoderPro.com contains everything — code sets, tables, appendixes — from ICD-9-CM, ICD-10-CM, CPT® and HCPCS Level II, in addition to having the most coding icons to make your coding more accurate. EncoderPro.com shows all the changes to a code, whether it has edits to the description or has been reinstated. In addition, users will see aggregated lists of new, deleted, revised, reinstated, resequenced (CPT®), add-on (CPT®), exempt (CPT®), unlisted (CPT®), quantity (HCPCS), Medicare (HCPCS), CC (ICD-9/10), age (ICD-9/10), sex (ICD-9/10) and manifestation (ICD-9/10) codes. Future CPT® and HCPCS code lists are also provided before they become effective.

Coding		
Current Procedural Coding Expert	CPT Codes	Contents
HCPCS	New Codes	Introduction (Current Quarter Only)
ICD-9-CM Data	Revised Codes	Index
ICD-9-CM Index	Reinstated Codes	Evaluation and Management Notes (Current Quarter Only)
ICD-9-CM Pa	Resequenced Codes	Evaluation and Management
ICD-10-PCS	Deleted Codes	Anesthesia
ICD-10-CM Di	Cover Codes	Surgery
ICD-10-CM Index		Pathology
Future Codes		Pathology and Laboratory
Modifier List		Medicine - Part 1
Change Codes		Medicine - Part 2
		Category 9 Codes
		Category 8 Codes
		Appendix A - Modifiers
		Appendix B - New Codes
		Appendix B - Revised Codes
		Appendix C - Deleted Codes
		Appendix C - Coverage of Deleted Codes (Current Quarter Only)
		Appendix D - Resequenced Codes
		Appendix E - Add-on, Modifier 51, 52, and Modifiable Sedation Codes (Current Quarter Only)
		Appendix F - Place and Type of Service (Current Quarter Only)
		Appendix G - Pub 100 References (Current Quarter Only)
		Appendix H - Glossary
		Appendix I - Listing of Secondary, Modifier, and Shared Services (Current Quarter Only)
		Appendix J - Vascular Families (Current Quarter Only)
		Appendix K - Physician Quality Reporting System
		Appendix L - Weekly Update Files (Current Quarter Only)
		Appendix M - Inpatient Only Procedures (Current Quarter Only)
		Appendix N - Huberize Assays vs. Algorithmic Assays (Current Quarter Only)

## How often is the coding content updated? Who reviews the content?

An entire team, including clinical technical editors (Optum360 code book editors), is dedicated to managing each set of data we provide and they follow well-established quality measures. EncoderPro.com is updated every month, ensuring you have the most complete, accurate and up-to-date content available, including LCD/NCD content.

## EncoderPro.com sets that bar as the industry standard.

With all the reasons outlined above, plus more than 25 years of coding expertise behind it and a team of clinical technical editors who review, manage and update content every month, it's clear why EncoderPro.com is the industry leader for online medical coding referential tools.
