

INCREDIBLE FACTS

ABOUT 5G

Although 5G is under testing at the moment, vendors are aggressively investing in it. Why?

Because 5G is the future. It will be faster and more connected like previous telecommunication generations. This way, 5G will be able to open the door to the IoT (Internet of Things). In 10-15 years this will quite likely mean, that there will be 10-100 times more Internet-connected devices than humans. Here comes the age of machine-to-machine communication (M2M).
