

For Immediate Release

Azima DLI Announces New TRIO 8-series and 10-series Vibration Data Collectors

Latest Additions to the WATCHMAN Reliability Suite Provides Improved Enterprise Visibility Into Condition Based Monitoring Programs

WOBURN, Mass. – September 17, 2013 – [Azima DLI](#), the leader and premier provider of Predictive Maintenance (PdM) analytical services and products, today announced the availability of its TRIO™ CA8 / CX8 and CA10 / CX10. The latest generation of vibration data collectors and machine condition analyzers from Azima DLI feature a lightweight portable design to meet the demands of the field while delivering data at improved safety and efficiency levels. Azima DLI's TRIO brand data collectors are Portal-Enabled allowing them to connect directly to the Azima DLI Watchman Reliability Portal™ for complete visibility into a facility's PdM program with real-time results and business level metrics.

“As a company, we strive to provide our customers with cutting-edge technologies that help them manage their work and ensure safety and efficiency across plant floors,” said Randy Johnson, vice president of sales and marketing, Azima DLI. “The TRIO 8-series and 10-series devices have been specifically designed to improve the flexibility, usability, productivity and safety of field data collection technicians while enabling them with the latest wireless technologies to get their jobs done efficiently.”

TRIO CA8 Vibration Data Collector and CX8 Expert Diagnostic Analyzer

The CX8 is ideal for maintenance professionals who desire a thin, tablet-style device for their everyday work. New features and capabilities of the TRIO CA8 and CX8 aim to help maintenance workers circumvent time-intensive traditional data collection processes while ensuring top performance, productivity and safety to users evaluating the success of PdM programs. The 8-series offers users a convenient device that is extremely portable and lightweight. This TRIO comes with 2-year accidental damage protection for complete piece of mind.

A top of the line computerized system, the TRIO 8-series vibration data collector is a durable, lightweight instrument that features a 10" tablet controller allowing users to easily see data while they are in the field. The TRIO CX8 is WATCHMAN Reliability Portal-Enabled and comes with Genuine Windows® 7 Professional pre-installed giving customers the option of making a seamless connection to the maintenance department's network or operate as a stand-alone instrument right out of the box.

TRIO CA10 Vibration Data Collector and CX10 Expert Diagnostic Analyzer

The Trio 10-Series has been given an IP-65 environmental rating, offering customers who need an extremely rugged device the endurance demanded in some industrial environments. In an industry where safety and performance are critical to the success of predictive maintenance

programs, the CX10 is ready to perform at all times with a large hot-swappable battery, powerful dual-core processor and 10" touchscreen. The TRIO 10-series is also WATCHMAN Reliability Portal-Enabled, empowering maintenance professionals with actionable information when they need it, 24 hours a day, seven days a week.

Paramount to all TRIO data collection instruments is the integration of Bluetooth® modular technology to ensure the safest in-field operation and the lowest overall cost of ownership possible.
