

For Immediate Release

**Azima DLI CEO Burt Hurlock to Participate in Executive Panel at
EUCI Power Generation Summit**

*“The Future of Remote Monitoring Technologies and Analysis” Roundtable Brings Leading Experts
Together to Discuss Technology’s Benefits to the Power Generation Industry*

New Orleans, LA – Power Generation Summit – February 26, 2013 -- [Azima DLI](#), the leader and premier provider of [Predictive Maintenance](#) (PdM) analytical services and products, today announced that CEO Burt Hurlock will be speaking at the [EUCI Power Generation Summit](#). Hurlock will contribute to the “Future of Remote Monitoring Technologies and Analysis” post-conference workshop that is also featuring executives from Luminant, OSIsoft Corp, GP Strategies and the Tennessee Valley Authority.

Who: Burt Hurlock, CEO, Azima DLI

What: The EUCI Power Generation Summit brings together all of the professional disciplines responsible for achieving optimum operational performance and reliability of a power plant. Its aim is to provide attendees with an in-depth examination of the unique automation technology issues being faced by utilities and to share best practices among peers.

Hurlock will provide his perspective on the future direction, strategies and opportunities for expanding remote monitoring technologies across the power generation industry with the goal of improving performance and reliability while reducing operational costs. Azima DLI offers a scalable collection of integrated professional services to provide a clear understanding of machinery health across an entire plant and enterprise. Through its depth, virtualization and automation, Azima DLI’s [WATCHMAN Reliability Services](#) delivers highly effective condition monitoring service solutions that support maximum plant availability, reduce risk, improve safety and increase production. Azima DLI delivers solutions to all stakeholders within a plant’s operation by providing comprehensive expert machinery diagnostics of multiple technologies all readily available through the [WATCHMAN Reliability Portal™](#).

When: EUCI Power Generation Summit takes place on February 27 – February 28, 2013. The “Future of Remote Monitoring Technologies and Analysis” will begin at 8:00 a.m. and conclude at 12:30 p.m. on March 1

Where: The conference will be held at the Hilton New Orleans Riverside in New Orleans.
