

Software Developer – C#, VB6, VB.Net, .NET, SQL, GUI

Azima, a long established and growing business in Kitsap County, is seeking a full time junior to mid-level software development engineer. Azima provides global industrial technology services delivered through factory floor hand held and online data collection devices connected to our cloud based portal and information delivery system. Our customers reliably depend on our services and systems to maximize industrial productivity and uptime.

We are seeking a highly motivated Software Engineer to join the team and work to build, maintain, and modernize our suite of applications.

You will be responsible for the following:

- Learning the system architecture of our principal code base and processing systems
- Working very closely with the most senior developers at the company
- Developing modernized equivalent components
- Working with the quality and test engineers to optimize user experience and accuracy
- Developing software specifications and design documents as required.

Requirements:

- 5+ years development experience with Windows UI applications
- 3+ years of experience writing code in C# or VB.Net
- Experience with database applications and an understanding of SQL
- Experience with Visual Basic 6
- Experience working with Visual Studio 2012 or higher
- Ability to work independently and be self-directed
- Self-motivated and eager to learn
- Positive attitude
- Detail oriented
- Excellent verbal and written communication skills
- Good interpersonal skills
- Team player
- Takes ownership of projects

Additional skills desired:

- BS Degree in Engineering or Computer Science a plus
- Experience working with SQL Anywhere
- C/C++ development experience
- COM programming experience
- Experience with InstallShield
- Mathematics or engineering background is a plus

Compensation: DOE

We offer full medical benefits, PTO, and 401K. Interested candidates please respond to this ad with your resume and cover letter.
