

For Immediate Release

Azima DLI Exhibiting at the 41st Turbomachinery & 28th International Pump User Symposia

Premier PdM Analytical Services and Products Provider Showcases Latest Offerings for Outsourced, Internal, OEM and Naval & Marine Environments

HOUSTON- 41st Turbomachinery & 28th International Pump User Symposia - September 25, 2012 -- [Azima DLI](#), the leader and premier provider of [Predictive Maintenance](#) (PdM) analytical services and products, today announced it will be exhibiting at the 41st Turbomachinery & 28th International Pump User Symposia in Houston. The company will be demonstrating the benefits and functionality of its flagship [WATCHMAN Reliability Services™](#) as well as its latest products: [TRIO™ CX7](#), [TRIO™ CA6](#), the [WATCHMAN Reliability Portal™](#), [ALERT™ Software](#) and [SpriteMAX™ Online Monitoring System](#).

- Who:** Azima DLI is the leader and premier provider of predictive maintenance analytical services and products that align with customers' high standards for reliability, availability and uptime.
- What:** Manufacturing companies are presented with a number of challenges – including an aging workforce and diminishing budgets – that can thwart their attempt to enhance productivity and eliminate unplanned machinery failures. Azima DLI provides these organizations with the predictive maintenance tools, technologies and expertise necessary to achieve their maintenance and uptime goals in any environment:
- [Outsourced](#) – Azima DLI's WATCHMAN Reliability Services combine the world-class WATCHMAN Reliability Portal, handheld TRIO™ data collection technology, online systems and the bench strength and knowledge of WATCHMAN Analysis Experts™ to help customers achieve a predictive program that is unencumbered by capital costs. These WATCHMAN Reliability programs take advantage of multiple technologies including vibration analysis, infrared thermography and oil analysis to determine machine health. Customers can maintain their direct involvement in the program by taking data and transmitting it to Azima DLI analysts for diagnostic review via the WATCHMAN Reliability Portal or WATCHMAN Reliability Services can provide a complete turn-key program depending on customer needs.
 - [Internal](#) – Azima DLI has spent years developing world class software and data acquisition instruments, coupled with proven methodologies for training and implementation of high quality, sustainable, collaborative and actionable in-house condition monitoring programs. Whether you are starting from scratch or re-

institutionalizing a predictive maintenance program from the past, Azima DLI will be with you every step of the way by providing technology, advice, and the expertise you need to assure a sustainable program.

- [**Original Equipment Manufacturers**](#) (OEMs) - Azima DLI offers custom predictive machine monitoring programs for OEMs that are interested in offering insight into their equipment's health at their customer's site. These programs are designed to be complementary to existing service organizations already visiting customer sites or they can be augmented or deployed with WATCHMAN Reliability Services resources.
- [**Naval & Marine**](#) - While Azima DLI is known across multiple industries today, the company established its roots in the Naval and Marine industry years ago. Azima DLI is the product of over two decades of collaboration between the US Navy and the company's top-tier engineering talent, resulting in the world's longest running and most effective condition monitoring programs. Spanning the globe via satellite, the company protects the ships that protect the world.

When: The 41st Turbomachinery & 28th International Pump User Symposia takes place September 23-27, 2012.

Where: The conference will be held at the George R. Brown Convention Center (GRBCC) in Houston.

About Turbomachinery & International Pump User Symposia

The Turbomachinery Laboratory sponsors two annual symposia, held in the Fall of each year, to promote professional development, technology transfer, peer networking, and information exchange among industry professionals.

These two events are led by engineers with vast experience in the petrochemical, process, chemical, utility, contractor, and consulting fields, along with manufacturers of rotating equipment and fluid-handling equipment from around the world.

Both symposia feature lectures, tutorials, case studies, discussion groups, and short courses, as well as exhibits of the latest services and full-sized equipment. These international meetings emphasize the technology and troubleshooting that users need in today's challenging workplace.

About Azima DLI

Azima DLI, www.azimadli.com, is the leader and premier provider of predictive maintenance analytical services and products that align with customers' high standards for reliability, availability and uptime. Azima DLI's [WATCHMAN Reliability Services™](#) utilize flexible deployment models, proven diagnostic software and unmatched analytical expertise to deliver sustainable, scalable and cost-effective condition-based maintenance programs. The company's offerings enable customers to implement comprehensive, predictive maintenance programs that ensure asset availability and maximize productivity. Azima DLI is headquartered in Woburn, Massachusetts with offices across the U.S. and international representation in Asia-Pacific, Central America, Europe and South America.
