Advanced Analytics

Drive more Coachable Moments™ with the data you've never had access to before. Identify where technique improvements are needed and who is being overexposed to head-impacts. Use the information to drive decision making where it's needed most.

Impact Detail

Use our interactive 3D Athlete Heat-Map to analyze specific head-impacts by location and trends over time. Improve technique of those putting themselves at risk by failing to remove their head from a block or tackle.

Data on Demand

Gain instant access to automated Impact Summary Reports to identify Team trends and outliers. Use the reports to manage impact exposure for the team, each position, and athlete to ensure your program is limiting head-impacts.

STOP guessing, START monitoring

DATA DRIVEN RESULTS

Head-Impact Monitoring

Track impact counts, location, and severity for each athlete through a variety of sports. Use real-time alerts so you never miss a potentially dangerous impact.

Analytics Suite

Watch how we take data and break it down to gain a full understanding of where the opportunities are by athlete, position, and team.

Automated Reports

Let us deliver a complete breakdown of the data with key metrics directly to your inbox.

Secure Cloud Storage

All data is backed up with secure cloud storage. Use permissions to set access level by team and school district.

Dedicated Support

In-house support and dedicated representatives to ensure each partner gets full advantage of our offering and help throughout the season.

Backed by Science

Completed validation and continued optimization with key researchers and top University institutions.

Impact Locations

Impact Count

Impact Severity

Performance Tracking

Mount Si High School
Head Football Athletic Trainer
Katelyn Hansen

"When we first saw the reports, it was easy to identify which athletes weren't keeping their heads up, so the coaches knew who they had to work closer with. Reviewing the data after a game or a practice I can use the data to help make more informed decisions."

University of Washington
Head Football Athletic Trainer
Rob Scheidegger

"It's like an extra set of eyes on the field that can give us real-time information about what's going on and where we can identify high risk drills."

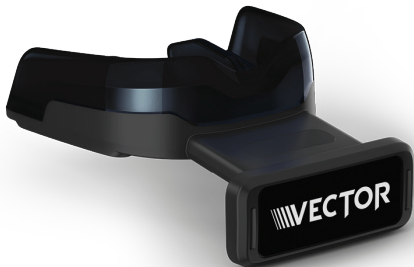

Bethel School District
District Athletic Director
Bryan Streleski

"The ability to collect data that informs the coaches on what to teach and reteach to the team or individuals is exceptional. The ability to collect data during practice and use the information to plan practices that limit head impacts for all position groups is a huge factor in player safety."

VECTOR[®]

The VECTOR MouthGuard is your team's solution for uninterrupted real-time head-impact monitoring giving your staff additional eyes and ears during games and practices. Equipped with exclusive Vistamaxx material from Exxon Mobile - experience a tight custom fit, superior durability, and enhanced breathability.
