

GLOBAL DATA MANAGEMENT (GDM)

ENAVATE's Global Data Management tool is a software application designed to provide flexible, consistent management of global master data and parameter setting across your organization.

Increase the quality, reliability and performance of your Dynamics AX Solution

- **Ensure data control, integrity and transparency.**
Structured data governance and distribution across your business.
- **Balance corporate and subsidiary needs.**
Faster response times, fewer errors and better business support.
- **Improve operational efficiency and insight.**
Reduce manual and double data entry – save time and avoid errors.
- **Define a baseline for accurate BI & reporting.**
Base business decisions and reports on accurate, valid global data.
