

FUND PROFILE AND STRATEGY:

The Emperor IP Momentum Equity Fund is a moderate to high risk, equity fund. The objective of this portfolio is to achieve capital appreciation by following a quantitative medium to long term equity strategy investing in the most liquid shares on the JSE. The portfolio is constructed using proprietary ranking and weighting methodologies to select momentum, growth, value and blue chip shares. The strategy is designed to provide the maximum returns obtainable from a pure equities investment at the lowest risk possible. A minimum exposure of 80% to SA equities will be maintained at all times, and a maximum of around 95%.

A unique characteristic of this pure momentum strategy style is the aggressive and defensive components which dynamically change exposure between aggressive and defensive depending on whether we are expecting bull or bear markets.

WHO SHOULD INVEST?

This fund is suitable for investors who are looking for outperformance relative to the FTSE/JSE Top 40 Total Return Index and want long-term capital growth. The fund offers strategy diversification from traditional investment styles.
