

QuickBase Training Your Way.

PROPER TRAINING IS ESSENTIAL FOR YOUR TEAM TO ADOPT AND GET THE MOST OUT OF QUICKBASE.

Veil Technologies' trainers have worked with small businesses and the world's leading companies to help them realize the full power of QuickBase. We are committed to offering effective and engaging training customized to your goals, budget, and organizational culture. Below are some of the services we offer:

We will customize the training to fit your goals and budget.

Veil Technologies is a business consulting and PaaS firm specializing in Intuit's QuickBase online database.

We combine sound business know-how, creativity and QuickBase expertise to go beyond traditional consulting, providing powerful web-based solutions for a wide variety of businesses.

Intensive Build

You have an idea for an application, and you want your team to help build it and support it. Veil will provide a 2 day crash course in which we will train your developers, help design your database architecture, and work collaboratively with your team on the first version of your application.

End User Training

Your application is live and you want to start training your team how to use the application. Veil will come on-site or work virtually to train each of your user groups how to perform their primary functions within your QuickBase application.

QuickBase Developer Training

You want to train your team to support and develop within QuickBase. Veil will provide advanced QuickBase development training specific to your application environment, either virtually or on-site.

Training Content Development

QuickBase has now become central to your business and you want to continually train new employees. Veil Technologies will develop the content you need to be successful. Whether you need training manuals, videos, or presentations, we can customize a training program to fit your needs and budget.
