

Your clients trust you. Do you trust your software?

Every aspect of your business relies on software. We trust business applications with our most critical and private data. Safety, financial, health and communication are all critical business functions that run on custom or off-the-shelf applications.

Yet, in our research, 98% of applications presented at least one security risk, while the average application registered 22.4 vulnerabilities.

Verify your trust with **ASPECT SECURITY**
Application Security Experts

WE ARE APPLICATION SECURITY EXPERTS

Our mission is to protect the applications that run your business. We offer a strategic, structured approach that identifies, quantifies and addresses your security risks.

PROVEN EXPERTISE

Our team is highly collaborative and will integrate seamlessly into your development process. Our security engineers were developers first—they understand the challenges your team faces every day.

Our team's depth and breadth of experience also gives them an exceptional appreciation of how application security and business demands intersect.

A TRUSTED PARTNER

You earn client trust every day. We can help you keep it. Contact us to discuss your application security needs today.

OUR SERVICES

Aspect Security can help you meet your application security needs with a wide variety of custom, strategic and tactical services. We've worked with organizations worldwide, protecting critical applications in the government, defense, financial, healthcare, and retail sectors. Let us bring that experience to bear on your environment.

STRATEGIC SECURE DEVELOPMENT PROGRAMS

Fixing vulnerabilities costs thirty times less at the beginning of the Software Development Lifecycle (SDLC) than after deployment. Work with us to assess your security capabilities and build a strategic plan to secure your applications.

AUTOMATION AND CONTINUOUS APPLICATION SECURITY

Maximize your security investment by streamlining your security processes. From automating simple security tasks to getting a bird's-eye view on your software portfolio with live dashboards and actionable data, we can help you produce more secure code at DevOps speed.

THREAT MODELING AND RISK MANAGEMENT

Quickly identify threat agents and quantify the implications to your systems and business. Consider regulatory and compliance requirements. Then work with us to create a prioritized plan for assessment, remediation and training efforts.

MOBILE APPLICATION STRATEGY

Mobile application security can no longer be an afterthought. With applications that connect users to your business becoming ubiquitous, you need to consider how mobile security fits into your overall security strategy. We can help with architecture review and assessment of your mobile applications, as well as a proactive plan to secure your full mobile application portfolio using industry standards like the OWASP Top Ten Mobile Risks.

SECURITY ASSESSMENT

Our engineers are experts in the three pillars of application assessment: architecture review, code review and penetration testing. Don't leave your most critical applications to chance—work with us to prioritize your portfolio and execute the most appropriate assessment strategy.

TRAINING

Aspect Security has trained thousands of developers, architects, testers and managers around the world in application security. Our instructor-led training provides an in-depth, hands-on experience that gives your team the knowledge they need to find vulnerabilities before they affect your business. Our broad eLearning curriculum allows you the flexibility to bring your distributed team up to date, while meeting compliance requirements and improving your security posture.

We deliver on time, on budget and with an exceptional level of commitment. Contact us today to discuss how we can help you.
