

# Scale and sustain the MTP model now and for years to come.

## What does it mean to be a credentialed MTP coach?

An experienced coach in the MyTeachingPartner Coaching program has met rigorous Teachstone standards. Set apart from other types of instructional coaches, MTP credentialed coaches are experts in CLASS-based coaching for teachers, using a validated model.

## Learn from the Experts

- The MTP program helps teachers improve the interactions that boost children's learning.
- Using video from teachers' classrooms and the CLASS framework, coaches provide individualized, targeted feedback and support through structured observation cycles (see graphic above).
- The path to become credentialed can begin once an MTP coach has completed one year (10 months) of MTP coaching.

## Become the Expert

- For an organization, growing credentialed MTP coaches means investing in making your coaches experts in your community and scaling a validated coaching model.
- The path to credentialing is designed to set coaches up for success, transitioning them from receiving intensive supports to mentoring their teachers more independently.
