Introducing ACM Cylinder Tracking

ACM and Dynamic Cylinder Tracking

What is ACM?
ACM, WestAir's proprietary cylinder tracking system, keeps track of cylinders and assets like never before. We utilize the latest in barcode, mobile scanning, and internet technologies to record transactions in real time. Each of our cylinders have a unique barcode which is scanned when a cylinder enters or leaves your location. The barcode data is uploaded daily into our computer system and is available for you to access from an easy to use website.

Why is WestAir investing in this?
We want to make it easier for you to do business with us. Too often a lack of information creates conflict between customers and suppliers. Our new technology will help us share information so we can be a better business partner. We believe you will find great benefit in this new value added service.

Customer Benefits

- **ACM cylinder balances**
  ACM utilizes the latest mobile barcode scanning technology to track assets in real time eliminating costly inventory methods and errors and producing accurate monthly billing statements.
- **Strategic Cylinder Utilization**
  Quickly and easily login to evaluate cylinder asset movement and efficiency. Easily identify slow moving cylinders and surplus dock inventory for smarter management.
- **Expiration Alerts**
  Receive email alerts notifying you of any upcoming expiration dates on Specialty Gases.
- **Track your cylinders online**
  ACM's online service allows you to access vital information about your cylinders online including:
  - Delivery Confirmation
  - Current cylinder balances
  - Cylinder balances allocated by department

We scan cylinders each time a cylinder enters or leaves your location.

We can give you a printed proof of delivery on the spot.
