Job Title: Intern

Job Description: Interns are an integral part of our team which consists of Volunteers, Aides, Specialists, Therapists and Directors. You will gain experience in exercise progression, modalities, equipment use and safety, and be exposed to training techniques specific to reorganizing and reactivating the central nervous system after a neurological injury. As an intern you are expected to assist during client sessions, which often require moderate to strenuous exertion. Frequent lifting and carrying of clients is also required throughout your day. Toward the end of the internship, if you have demonstrated a comprehensive ability to do so, you will be allowed to help design individualized workouts for clients and implement the workouts during one-on-one training sessions.

Daily Job Functions:
The following functions include, but are not limited to:

- Ensure the facility is clean and organized, equipment is put away after each use, trash cans are not over full, restrooms have toilet paper and paper towels, entry way is free of clutter, equipment is wiped down at the end of the day, water is full, etc.
- Assist Specialists with lifts.
- Assist Specialists with client workouts by getting proper equipment set-ups ready, assist and spot clients.
- Assist Specialists with body-weight supported treadmill sessions.
- Learn SCI 101.
- Learn FES (Functional Electric Stimulation) – its purpose, benefits, how to interpret output, and how to set up clients.
- Learn ReWalk set up/assembly per client and how to assist in gait training sessions.
- Become proficient in ICARE set-up and safety.
- Above all be a team player.

Qualifications:

- Must be working toward a Bachelors of Science in Exercise & Sports Science, Kinesiology, Athletic Training or other related field.

Anticipated Work Schedule & Job Specifications:

- Minimum Hours Required: 350 hours (+/- per school requirement)
- Unpaid
- Start Date: TBD
- End Date: TBD
