

Custody Suite Gets 360° Surveillance

BOSCH

Invented for life

“Our clients are able to view the whole cell area with a single camera. Finally, no more blind spots!”

Ian Moore, Quadrant Security Group (QSG)

Customer: West Midlands Custodial Suites

Sector: Correctional

Product: EX36 Corner Mount No-grip cameras

Mission: Finding the right cameras to safeguard custody suites

It was difficult to find cameras that were able to effectively monitor custody cells at West Midlands. “The key challenge faced in viewing custodial cells was blind spots,” Ian Moore, Quadrant Security Group, explained. “Our client needed to see the whole cell. Traditionally police officers on duty were not able to see the whole cell with their security cameras, and this meant putting prisoners at risk.” Providing anti-ligature fittings and visibility in night time conditions were other key concerns that West Midlands had.

Bosch EX36 Corner Mount No-Grip camera provides 360° surveillance

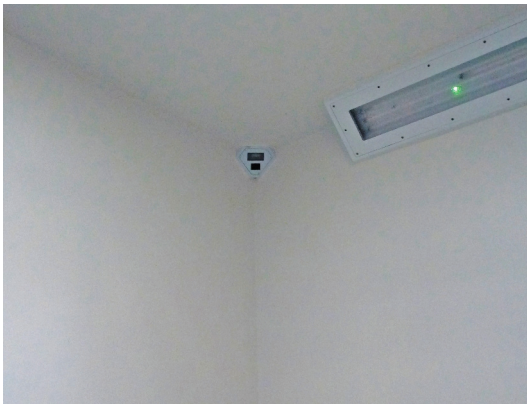

Ian Moore evaluated the Bosch cameras and discovered that they exceeded his client’s requirements:

“The main benefit is that the staff has confidence that the view is not compromised, and there are no blind spots in the cell areas. In addition, being able to see what is happening in the cells at night is critical. The cameras allow officers to view up to four cells from one control position with complete confidence, ensuring the safety of prisoners and the efficiency of the police staff on duty.”

The Bosch EX36 Solution

The Bosch EX36 Corner Mount No-Grip cameras are designed to deliver exceptional image quality in any lighting conditions. For correctional facilities the cameras include these benefits and more:

- Complete coverage of a 4.5 x 4.5m (15 x 15 ft) room
- Patented No-grip anchor-free design complies with anti-ligature fitting requirements
- High-resolution CCD offers excellent daytime and night time imaging performance

West Midlands uses EX36 Corner Mount No-grip cameras to effectively monitor custody cells
