

Extreme in Action: MIC1 Speed Domes for High-End Architecture

BOSCH
Invented for life

“From my perspective, the project went perfectly; the cameras were simple to set up and simple to operate.”

Charlie Snyder, ISR Solutions

Project: High-End Architecture
Sector: Commercial
Product: MIC1 Ruggedized PTZ Camera

MIC1 Speed Domes for High-End Architecture

The MIC1 Ruggedized PTZ Camera from the Bosch Extreme CCTV series was recently specified for use at the new headquarters of a major media company in New York. MIC1 was selected not only for its outstanding performance as a ruggedized speed dome but also for its sleek architectural design.

Problem: Modern Architectural Design Requires PTZ Performance

- Surveillance equipment must match aesthetics of modern new building
- Camera must have PTZ functionality with existing system protocol
- Camera must have low-light performance
- Camera must provide optical clarity in all weather conditions
- Camera must be positioned high on the building

Solution: Sleek MIC1 Design with PTZ Performance

- MIC1 design delivers the perfect look for modern buildings
- Aluminum or stainless steel construction
- Full PTZ capability featuring high-precision resolver technology and 18x and 36x zoom
- Perfect optical window with wiper
- Outstanding optics with mechanical filter and frame integration for low-light conditions
- Unmatched mounting versatility enables upright or inverted installation with unprecedented 320° tilt for viewing above and below

MIC1 is often specified into high-end architectural projects for its sleek, modern design

Results: PTZ Security with Form Matching Function

- Seamless blend of building exterior and surveillance equipment
- Original architectural motifs retained
- Effective surveillance with full pan-tilt-zoom functionality
- Improved building security
- Highly visible, yet eye-pleasing, crime deterrent
