

Business Centre Solutions

Our commercial model and technology sets us apart from other IT & Telco providers

Switch to VTSL with no risk!

We make it easy. Pay nothing upfront, cancel at any time and relax while we project manage everything.

“We are extremely happy with VTSL. Their commercial model is fantastic, the technology is great and they really do act as our partners. I trust them to deliver what our tenants want and they always have.”

- Richard, Chadwick Holdings

Generate more revenue from IT & Telecoms with VTSL

We understand that switching IT & telco providers may not seem worth the risk, even if it is a good commercial decision. At VTSL, we reduce that risk to ZERO by switching you over for free. You pay nothing upfront and can cancel at any time.

How we do it

1. We remove the commercial risk

There is no requirement to invest in equipment, there are no set-up fees and no install cost. Moreover there is no minimum term because we are confident you will love our service.

We also understand the balance between needing to offer competitive rates and make a margin. That is why our pricing structure and tariffs are designed specifically for business centres.

2. We remove the technology risk

VTSL was one of the first to market with a hosted VoIP offering for business centres in 2007. We have invested millions of pounds into our infrastructure and are a network carrier, not a reseller, with thousands of happy users across the UK.

Our proprietary platform is updated automatically twice a year so you are never at risk of your system becoming outdated.

VTSL's business centre solution includes the following:

- Hosted VoIP telephone system and user-friendly web portal
- Award-winning, high quality Mitel IP phones and Cisco switches
- Managed switching and bandwidth allocation
- 24 / 7 in-house technical support and the fastest SLA times
- Fibre leased-lines with a back-up line included
- In-built disaster recovery; instant diversion to mobiles / other sites
