GSX 365 Usage

Extend Office 365's built-in reports

Leverage GSX Solution's proven expertise to keep your business communications flowing.

GSX 365 Usage: the solution you need to build reports and maximize the value of your Office 365 deployments. It gives you insight and analytics into how people in your organization are using your Office 365 services.

You identify security risks and cost savings while maintaining visibility of changes in your environment.

Currently managing over 2 million Office 365 user accounts we collect information about your Office 365 environment each day and use it to create clear and customizable reports for your organization.

The GSX 365 Usage solution gives IT administrators a tighter grip on resource allocation, thereby increasing efficiency. Sophisticated reporting software tracks usage and manages compliance with organizational policies while proactively identifies security risks to keep information safe.

Log in to our secure, interactive web application at any time to access over 50 built-in reports designed to help you save money and maximize the value you get from Office 365.

Licensing & Usage

Save money by identifying unused licences and analyze how your Office 365 services are being used.

Customize & Schedule

Access and produce customized reports and graphs and automatically deliver them by email in PDF or CSV format.

Security & Compliance

Easily audit compliance with organizational policies and proactively identify security risks.
