

# SAVING MONEY WITH INVISILINK™ WIRELESS RADIO

InvisiLink™ wireless radios provide wireless communication between level sensors and PLCs or other data gathering devices.

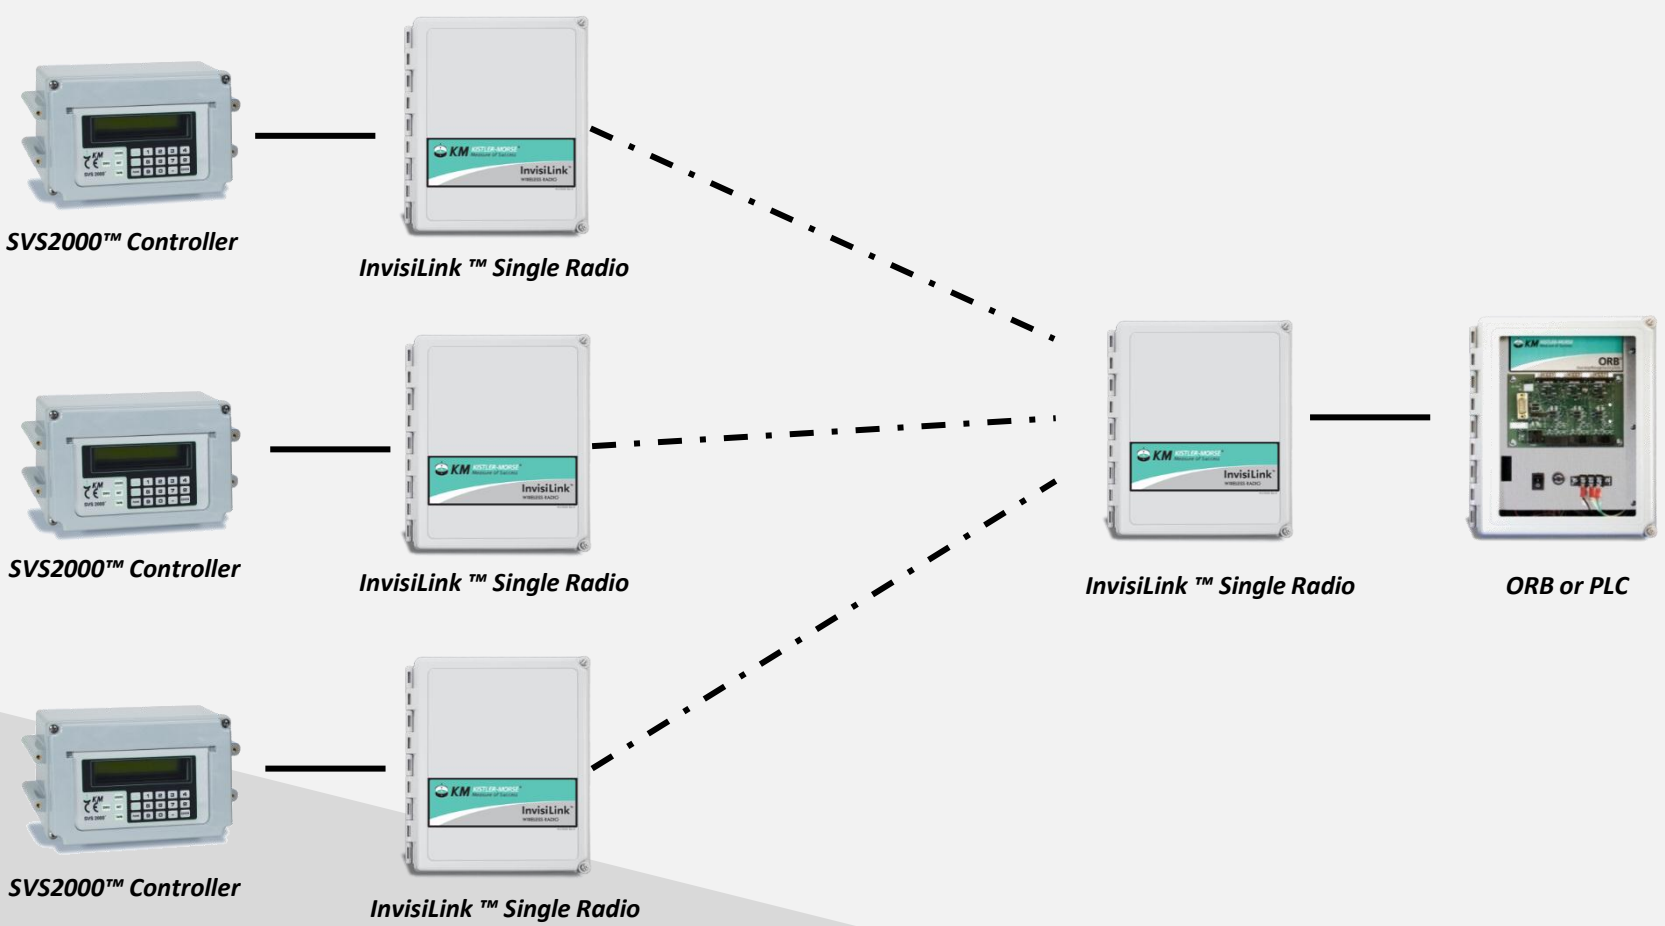

## ELIMINATE HARD-WIRED CONNECTIONS

InvisiLink™ wireless system eliminates the need for costly, labor-intensive cables and conduit providing a simple, stream-lined installation. Devices communicate through radio frequency instead of hard wiring.

## HOW INVISILINK™ WORKS

InvisiLink™ wireless radios communicate simply through point-to-point radio frequency.

## SAVE MONEY

The InvisiLink™ Wireless Radio eliminates some of the largest expenses associated with installation and maintenance of automation equipment such as wiring, conduit and labor. To see how much InvisiLink™ can save you, use the InvisiLink™ Cost Analysis Worksheet located below.
