

# Levels of the **MODERN** Workspace

Converging technologies in the workplace have become essential elements to maintain a competitive edge. Organizations are harnessing the power of technology to propel the performance and efficiency of their employees.

A complete Integrated System contains the following components:

## AUDIO

Keep audiences engaged and your workforce focused.

- Use sound masking technology to cut unwanted noise
- Ensure message is clearly heard
- Keep employees on task and reduce distractions

## VIDEO

Video conferencing is the future of business communication.

- Save time and travel expenses
- Encourage collaboration on a global scale
- Bring remote employees into meetings

## WIRELESS DATA

Wireless access to data via a wireless network.

- Access data from anywhere
- BYOD capable
- Enable remote teams

## SECURITY

Put unified security tools in place for optimal protection.

- Ensure on-site employee safety
- Reduce losses and false claims
- Access and control remotely

## TELECOM

Reduce costs when moving, adding, and changing phone set ups.

- Smartphone integration
- Seamless, remote, and multi-site
- Improve customer service
