DLT Solutions and Centrify Partner to Secure Applications and Infrastructure

Partnership to Bring Single Sign-on, Multi-Factor Authentication to the Public Sector

Herndon, VA — (September 7, 2016) – [DLT Solutions \(DLT\)](#), an award-winning, public sector technology company, and [Centrify](#), a leader in securing enterprise identities against cyberthreats, today announced a partnership focused on helping agencies protect against the leading point of attack used in data breaches – compromised credentials.

“All of the recent high-profile data breaches were due to compromised credentials,” said Jeremy Young, vice president, DLT’s cybersecurity division. “Centrify Identity Platform is recognized as a market leader by top analyst firms, and with DLT’s 25 years of government expertise and relationships, we look forward to delivering these game-changing capabilities to the public sector.”

The Centrify Identity Platform secures an enterprise’s internal and external users, as well as its privileged accounts, against cyber threats that target today’s hybrid IT environment of cloud, mobile and on-premises. The platform is comprised of Centrify Identity Service, Centrify Privilege Service and Centrify Server Suite.

“Current identity management is dangerously fragmented and needlessly complex,” said Greg Cranley, sr. director, federal and public sector sales for Centrify. “With Centrify Identity Platform, agencies can reduce risk and increase security, while improving compliance and productivity. Through our partnership with DLT, we will provide federal, state, and local government agencies a proven solution to solve this very complex problem.”

About DLT Solutions
