Steve Lazerowich

Practice Principal, Enterprise Security Solutions
Enterprise Services U.S. Public Sector,
Hewlett Packard Enterprise

Steve Lazerowich is a Practice Principal in the Cybersecurity Practice for the U.S. Public Sector market in HPE Enterprise Services. In his role, he provides guidance and expertise to clients and Account Teams on a variety of cybersecurity domains while specializing in Governance, Risk & Compliance (GRC) and Identity & Access Management (IdAM).

Prior to joining HPE, Lazerowich served as an Associate Director with Protiviti Government Services, providing project management and subject matter expertise to a number of government identity management programs, including the E-Authentication initiative, the Federal Identity Credentialing Committee (FICC), the Federal Identity, Credential and Access Management (FICAM) Subcommittee of the CIO Council, as well as provided support to the Chair of the Federal PKI Policy Authority. He has more than 15 years of experience in the federal information security space.

Lazerowich holds a Bachelor of Science from the University of Massachusetts. He has done graduate work at Worcester Polytechnic Institute, Harvard University Graduate School of Business, and George Washington University. He holds a Certified Information Security Manager (CISM) certification from ISACA, as well as a certified Federal IT Security Professional Manager (FITSIP-M) from the Federal IT Security Institute. He was a contributing author to a book on wireless security, has published a paper in the George Washington University Journal of Information Security, written/co-written papers on the subject of Identity and Access management and has been a speaker at the RSA Security Conference, Digital Government Inc. events, and was a keynote speaker during the Department of Homeland Security/U.S. Customs and Immigration Services (DHS/USCIS) cybersecurity awareness week.
