

Larry Sherrow, Federal Solutions Architect, Brocade

As a Brocade Federal Solutions Architect, Larry designs, installs, provisions, and maintains data center and campus networking hardware and software. He supports Brocade in the advancement of Data Center switching, working primarily with Data Center Solutions running on Virtual Cluster Switching technology, as well as SDN and NFV solutions.

Larry has more than 20 years' experience in the networking field. Before becoming a solutions architect, he worked with the Civilian team as lead systems engineer on the Social Security Administration account, spending countless hours implementing MPLS over their network. Prior to joining Brocade, Larry worked with the military installing data centers in South East Asia.
