

Neil C. Evans, MD
Co-Director, Connected Health (Clinical Director)
Office of Information and Analytics (OIA)
Veterans Health Administration (VHA)
U.S. Department of Veterans Affairs (VA)

Associate Chief of Staff for Informatics
Washington, D.C. VA Medical Center

Neil C. Evans, MD is a board-certified, practicing primary care internist at the Washington, D.C. Veterans Affairs Medical Center (VAMC) and the Co-Director of Connected Health, aligned under the Office of Informatics and Analytics, in the Veterans Health Administration within the U.S. Department of Veterans Affairs.

Dr. Evans and fellow Co-Director Kathleen L. Frisbee, PhDc, MPH (Program Director) lead the effort to improve services to Veterans, their families and Caregivers by increasing access, fostering continuity and promoting patient empowerment through electronic health technologies. They oversee the development and implementation of enterprise-wide Veteran digital health strategies, which will transform care delivery across the care continuum and geography, and facilitates alignment of health information technologies within VHA to produce a consistent experience for users and continuously improve based on user input, research and evaluation.

In addition to his role with Connected Health, Dr. Evans manages a panel of patients at the Washington, D.C. VAMC, where he also serves as Associate Chief of Staff for Informatics.

Dr. Evans began his VA career after completing medical school at Johns Hopkins University and then his training in Internal Medicine through the Osler Medical Residency, also at Johns Hopkins. He received a B.S. in chemical engineering from the University of Delaware. He holds faculty appointments in Medicine at George Washington University and Uniformed Services University of the Health Sciences.
