Current Solutions don't work

Firewalls, VPN and file sharing platforms create walls around networks. These can be bypassed by users creating security gaps.

Quiver solution is unique

Keep control of your information with Quiver file level encryption. You decide the terms before data can be shared; online and offline, no matter where the file goes.

Quiver Features

GEOLOCATION

Decide where a file is allowed to be viewed.

TIMEBOX

Share files for a limited time, with only the people you select: ideal for contracts, NDA's and price offers..

PRINTSCREEN PREVENTION

Prevent viewer from taking a snapshot of your digital file and print it to share without your permission.

COPY/EDIT PREVENTION

Restrict data from being taken out of your important files.

PRINT PREVENTION

No paper copies of your valuable data will be shared.

AUDIT TRAIL

Track and audit your data. Everywhere. Revoke access at any moment.

RESHARE PREVENTION

Prevent users from re-sharing your files

REVOKE

Revoke access in realtime to any file no matter where they are stored and with whom they have been shared.
