

BUILD AND RUN **BUSINESS APPLICATIONS**

FORMS | WORKFLOW | DATA | REPORTS

Across enterprises and within departments, K2 customers are rapidly transforming their companies with applications that connect people to information and work, anywhere and at any time.

With K2's visual tools, creating, launching and using the first K2 application is a snap. Reusable components ensure the next application delivers faster than the one before, and when the business needs change, it's easy to update your K2 apps to fit.

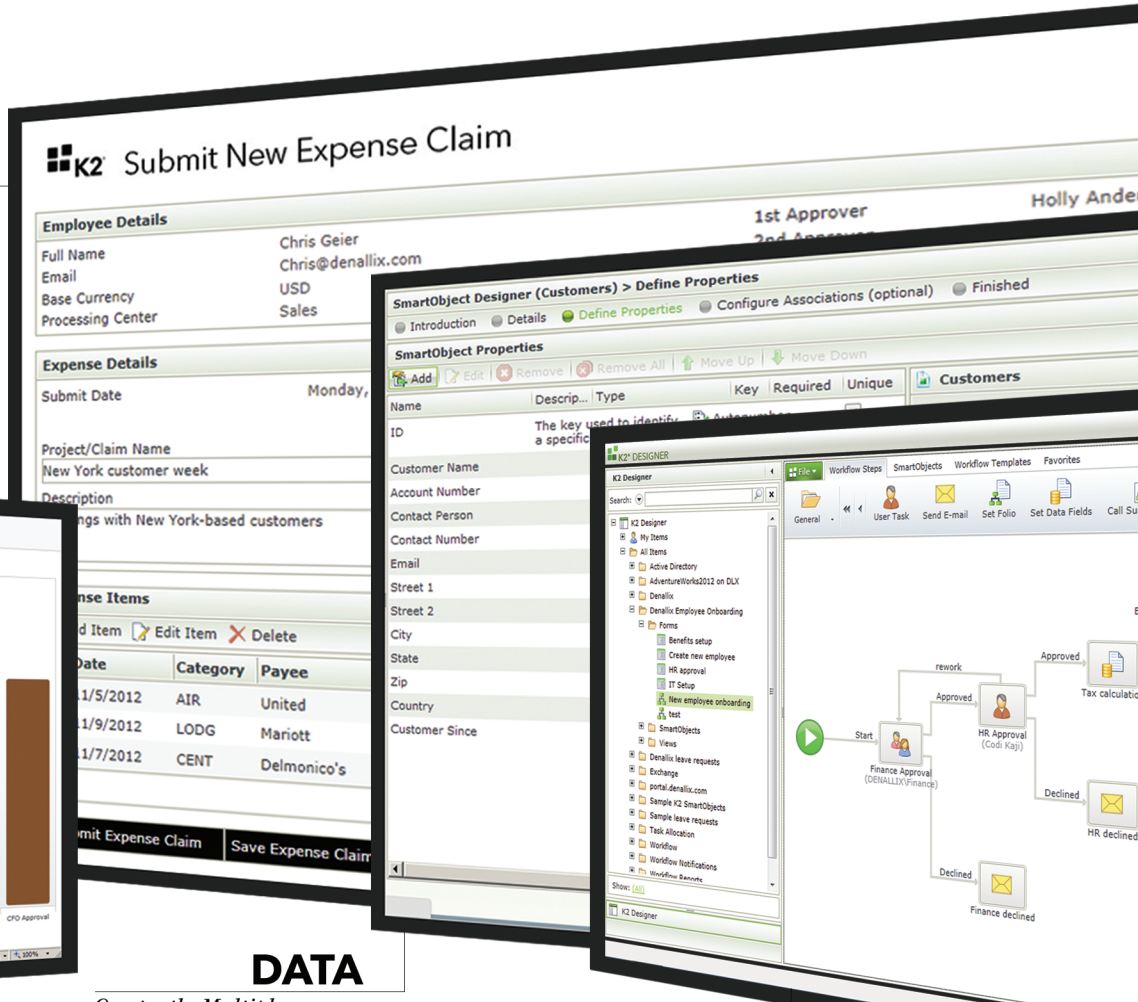

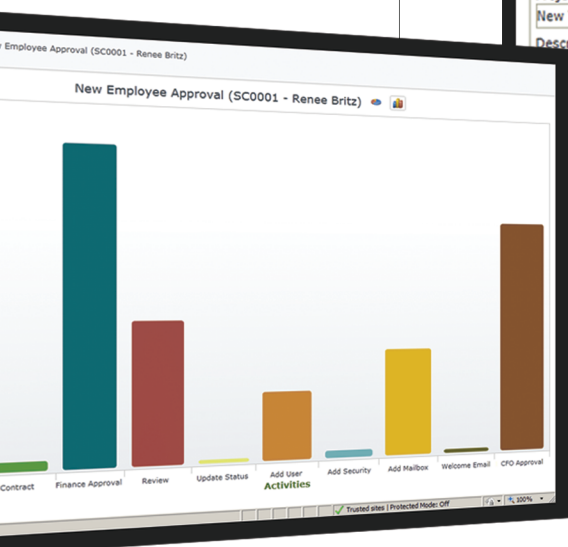

FORMS

Faster forms. More control.

REPORTS

Visibility matters.

DATA

One truth. Multiple sources.

WORKFLOW

Deliver outcomes.

FORMS

K2 provides a faster, easier way to create forms for business applications. With our drag-and-drop tools, code isn't necessary, and a powerful rules framework allows you to stay in control.

WORKFLOW

Intuitively design workflows that connect people to information and work – from basic task routing to complex enterprise-wide solutions.

DATA

Use visual tools, not code, to build reusable objects that use line-of-business and web-based data, regardless of where it lives.

REPORTS

Get real-time insight into process status and track the progress and performance of your applications. Easily create reports that combine business and workflow data.
