## Current Solutions don't work

Firewalls, VPN and file sharing platforms create walls around networks. These can be bypassed by users creating security gaps.

## Quiver solution is unique

Keep control of your information with Quiver file level encryption. You decide the terms before data can be shared; online and offline, no matter where the file goes.

## Quiver Features

### GEOLOCATION

Decide where a file is allowed to be viewed.

### TIMEBOX

Share files for a limited time, with only the people you select: ideal for contracts, NDA's and price offers..

### PRINTSCREEN PREVENTION

Prevent viewer from taking a snapshot of your digital file and print it to share without your permission.

### COPY/EDIT PREVENTION

Restrict data from being taken out of your important files.

### PRINT PREVENTION

No paper copies of your valuable data will be shared.

### AUDIT TRAIL

Track and audit your data. Everywhere. Revoke access at any moment.

### RESHARE PREVENTION

Prevent users from re-sharing your files

### REVOKE

Revoke access in realtime to any file no matter where they are stored and with whom they have been shared.

SECURE COLLABORATION

- Empower people to collaborate while protecting all information at file level.
- Securely use cloud services and collaboration across devices.
- Works with everyday apps such as MS Office, Google Docs and Adobe.

CUSTOMIZABLE CONTROL

- Quiver has integrations with Active Directory, SAML, openID and Oauth.
- Every document is different: therefore, the user or administrator sets the level of protection for each type of file.
- Change in permissions real time, at any moment. Revoke file access instantly from any user, device or cloud storage.

FRICTIONLESS ADOPTION

- Minimal rampup time: Quiver is installed with no change to existing business processes and tools.
- Intuitive functionalities and integration in your daily workflow allow for quick user adoption.
- Data is protected at the source: as soon as a file is created, it's automatically protected.
- No change in document formats and extensions.

## Formats we support

## Platforms we support

## Be the new standard for data control and protection

Quiver exists to put you in control of your files so you can share them with confidence. Our mission is to allow you to keep full ownership of your files while sharing them effortlessly on your terms.

### Where we are:

Amsterdam

In the heart of Amsterdam.  
Eat healthy and play table-football  
& ping-pong.

Lisbon

Have a Portuguese life: eat well,  
have fun in the sun, and party  
like rockstar.

San Francisco

Right in the heart of the innovation hub  
of the world; get inspired by great minds  
and people.

The safest and most intuitive way to share data.
