

CRS Skype for Business Room Control Software

**Conference Room Systems
for 2015**

Making Skype for Business dynamic & easy to control from any windows computer.

CRS

Powerful Meeting Room Control Software

Created specifically for Skype for Business (Microsoft Lync) and Office 365 users. This meeting room control software turns a regular Windows PC into a video conferencing control center. Leveraging resource booking technology from MS exchange, Office 365 or Google Calendars the CRS Meeting Control software enhances dynamic conference rooms by adding seamless integration for the platforms that matter to you.

Easy to Use

Top 30% of the screen elegantly displays your meeting room calendar on the screen. Simply click on any scheduled meeting to view details or launch your Lync, GoToMeeting, WebEX, Zoom, US and more...

Intuitive Interface

Integrating the essential compents of an important meeting into one easy to use screen. All your meetings, calendar events and links integrated into one clean interface.

Flexibility

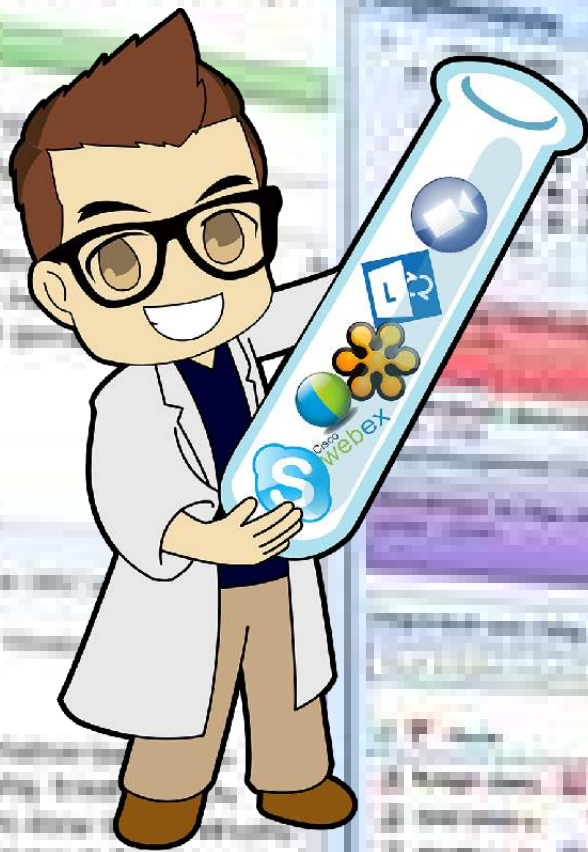

Simply plug in your Skype for Business, Office 365 and/or exchange credentials for your conference room. Using other conferencing software providers? No problem enter the credentials and let the software launch your meetings.

30 Day Demo

We offer a free 30 day demo you can install on any Windows machine to host your Skype for Business video conference calls. Downloading our free 30 day trial will prove just how easy this software is to integrate.

Installation Options

Locked Down Mode:
Launches at startup for full IT control over windows OS. This is the most user friendly and secure method.

Run as a Application:
Simply install software on your existing windows machine and launch application when you are ready to run your video conferences.

Technical Specifications

Available pre-installed on our Lync compatible room systems OR as a application install on your existing Windows PC. Simply connect your Lync / Office 365 & exchange information into the software and your done!

Integration with MS Exchange!

At the heart of every good solution is integration with the platforms you are already using. Schedule your meetings using Microsoft Exchange or Google Calendars and launch them with ease.

Once you're in the meeting room you will see the entire meeting room schedule. We support exchange attachments with password support to create a seamless experience from the desk to the conference room.

Core Benefits

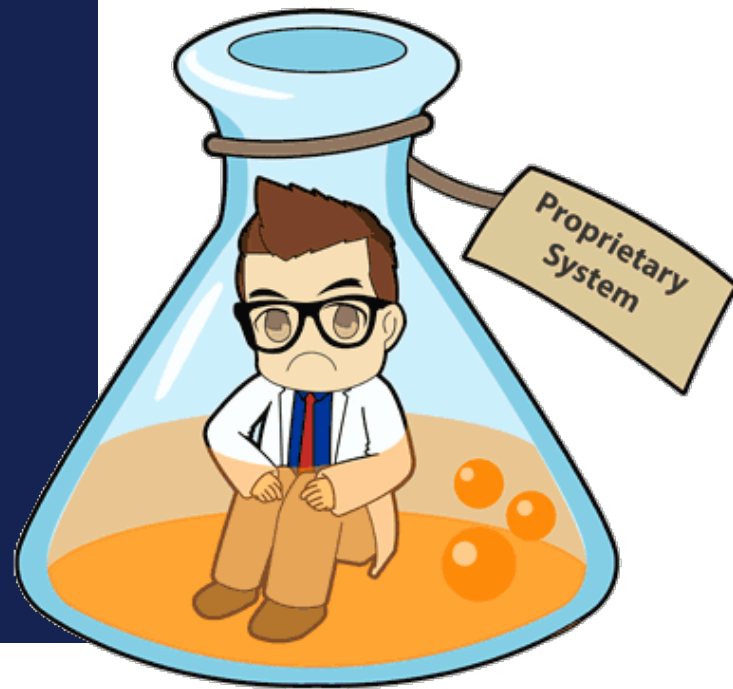

Controlling your Skype for Business Meetings is important. That's why we have designed a easy to use system that you can install on any Windows computer.

Why we use a regular Windows PC?

Windows 8.1 or Windows 10 provide the perfect operating system for hosting a Skype for Business video conference room.

Launch the calendar as in Windows Embedded or as a simple application on your desktop.

EASY TO USE

Launch your meetings with a click of a button whether it's Skype for Business, GoToMeeting, WebEX or Skype. Even add your own API's and buttons where you set the command.

THOUGHTFUL

Design by IT Management Pro's for a enterprise level experience that is easy to manage and deploy. We include security measures on everything from configuration to exchange attachments.

ROBUST

Enhance the already powerful Skype for Business experience by adding control software that provides easy of use with powerful integrations.

EFFICIENCY

Improve meeting efficiency's with scheduled meetings, one-click ad-hoc meetings and more...

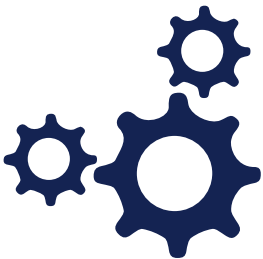

To make life easy we put together the best USB hardware together with our easy to use software

These systems include everything you need to install the system yourself.
