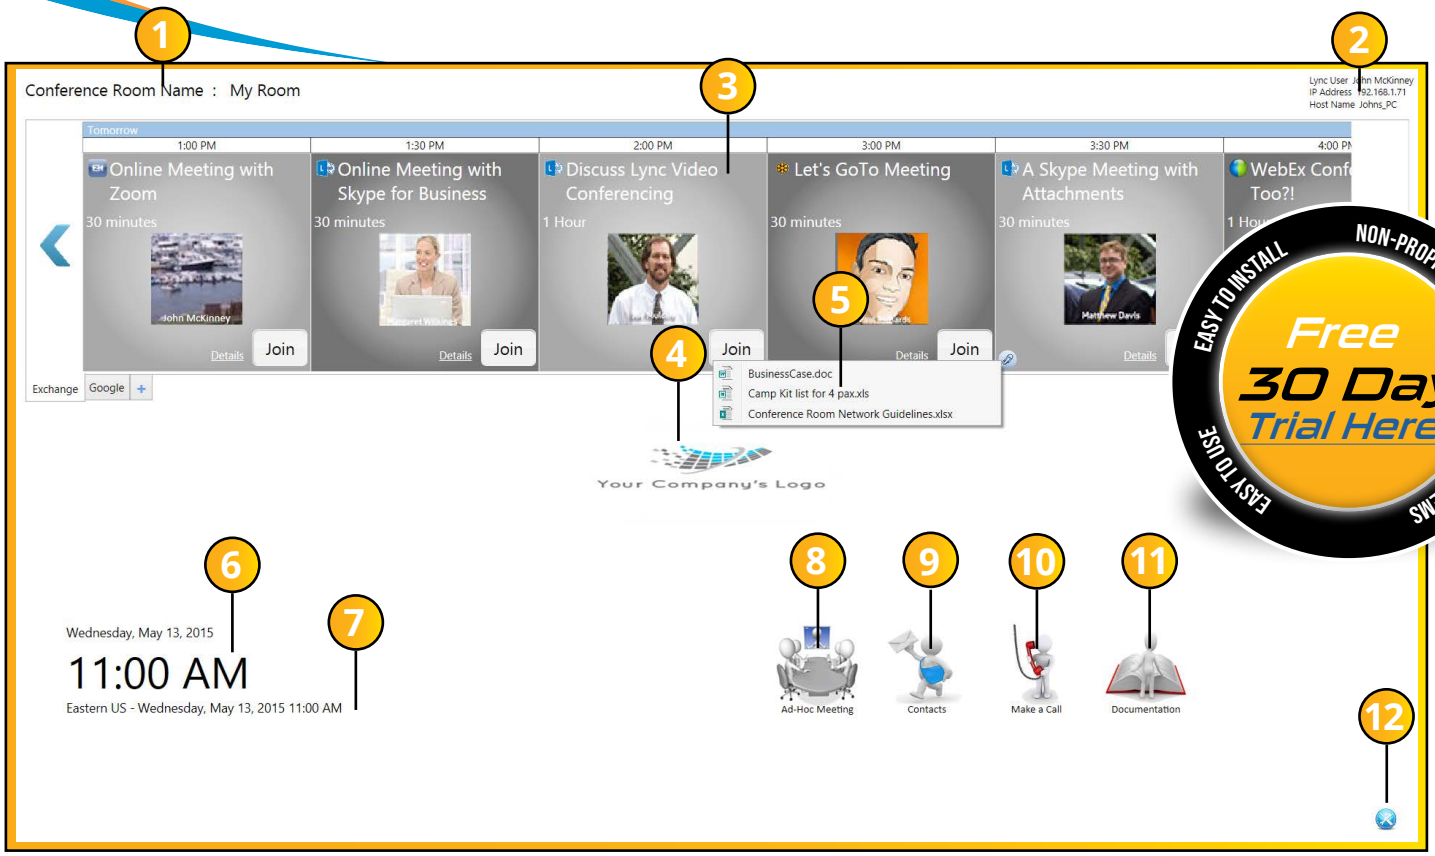
# Your Conference Room Dashboard



1. A configurable name for this specific conference room.

2. Informational block. The logged in user, this machines IP address and the machine ID.

3. The schedule bar is the heart of Unyfy. It is where all scheduled meetings regardless of provider are displayed and can be interacted with. It is driven from Exchange and/or Google Calendar and can recognize and lauch most meeting providers. You can also view details of the meeting by clicking Details. Joining a meeting is done with a single click of touch.

4. Place your own logo here to brand your Unyfy experience.

5. Unyfy supports Exchange attachments. The meeting scheduler will have the option to password protect attachements. Attachements can be opened by clicking the paperclip icon and entering password if required.

6. Locales: This displays the current date and time derived from the Windows settings.

7. Displays the date and time for up to 10 seperate locales.

8. Launch a ad-hoc Skype for Business video call.

9. Contacts allows you to search your organizations directory. From here you can IM and call directly.

10. If your organization has Skype for telephony integration this feature will allow you to place a phone call.

11. Unyfy ships with standard documentation. You may customize this button to direct to your documentation.

12. This buttons allows entry to the configuration module of Unyfy. It also provides On/Off and reboot for your machine in locked down mode.
