**ABT moves its Headquarters, New Job openings in Greensboro**  
01-07-2010

Greensboro, N.C. – Advanced Battery Technologies Inc, moves its headquarters to a new Greensboro location, improving the inventory management and accommodating recent company growth.

“This move facilitated better management of inventory, and gave us greater flexibility so that we can have the right parts, at the right place at the right time”, said Mike Brock, Director of Operations at ABT. The new building, which is located at 518 Teague Street in Greensboro, gives the company a more professional appearance and a place to hold meetings and demo their products. “The move has been a huge morale boost as well for many of the employees. It is a place we are all proud to be a part of, which also shows our continued growth”, said Mike Brock, Director of Operations at ABT.

“The new office layout allows for better organization, improved communication, and promotes employee pride in the success of the company. This move enables us to better serve our customers and be more efficient by improving turnaround on repairs”, said Ken Fearn, ABT President. With this new building, the company is also looking into expanding their team and opening up several new positions, including Corporate Service Manager, Parts Manager, and Shop Manager. ABT President, Ken Fearn, sums it up, saying, “We’ve experienced tremendous growth so far, and it’s been a grassroots effort, training our own people and doing whatever it takes to give customers what they want. We plan to continue doing so in the future, and this new building is a great foundation for our future growth and expansion”.

Advanced Battery Technologies Inc. is a fast-growing company that provides a broad range of product offerings to satisfy the needs of customers in the motive power and reserve power markets. ABT, founded in 2000, engineers, furnishes, installs and services industrial batteries and charging systems. The company can manage all battery back-up systems and battery-powered electric vehicles.
